Steady →

Significant surface water and river flooding impacts are possible but not expected in south Wales and parts of England today (Saturday). The overall flood risk is LOW.

Specific Areas of Concern Map 1: Saturday 26 October

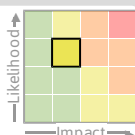

RISK AREA A
Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River Surface
Likely duration 1 Day

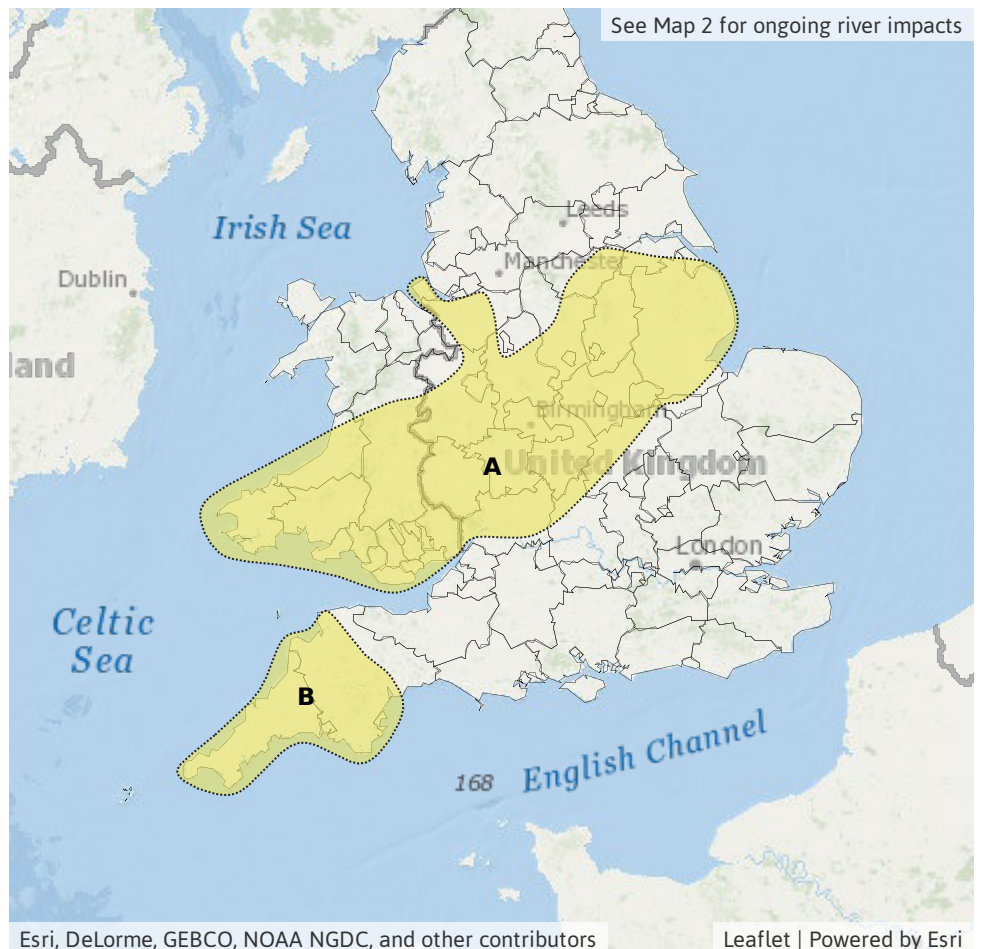

Further heavy rain possible here today.

RISK AREA B
Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 1 Day

Ongoing river response from recent heavy rain.

Flood Guidance Statement

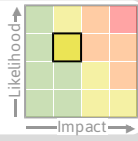

10:30hrs Saturday 26 October 2019

Areas of Concern Map 2: Saturday 26 and Sunday 27 October 2019

RISK AREA C

Impact **MINOR**

Likelihood **MEDIUM**

Source River

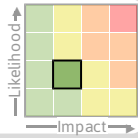

Likely duration 1 Day

Ongoing river flooding from recent rainfall.

RISK AREA D

Impact **MINOR**

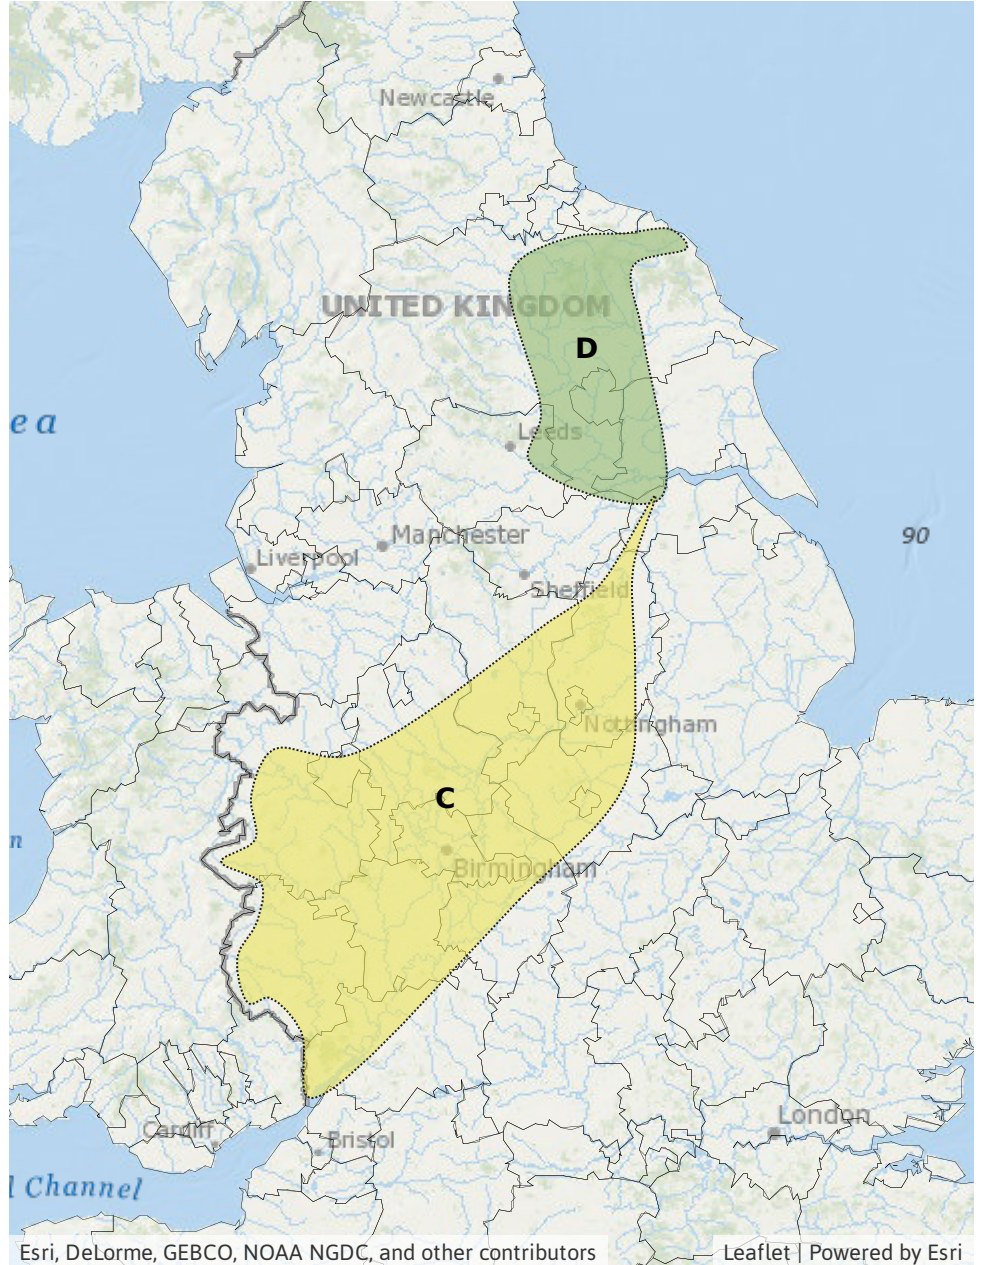

Likelihood **LOW**

Source River

Likely duration 2 Days

Rivers Ouse, lower Don, lower Aire Saturday and Sunday, river Esk Saturday only.

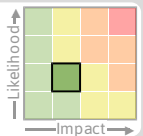

Flood Guidance Statement

10:30hrs Saturday 26 October 2019

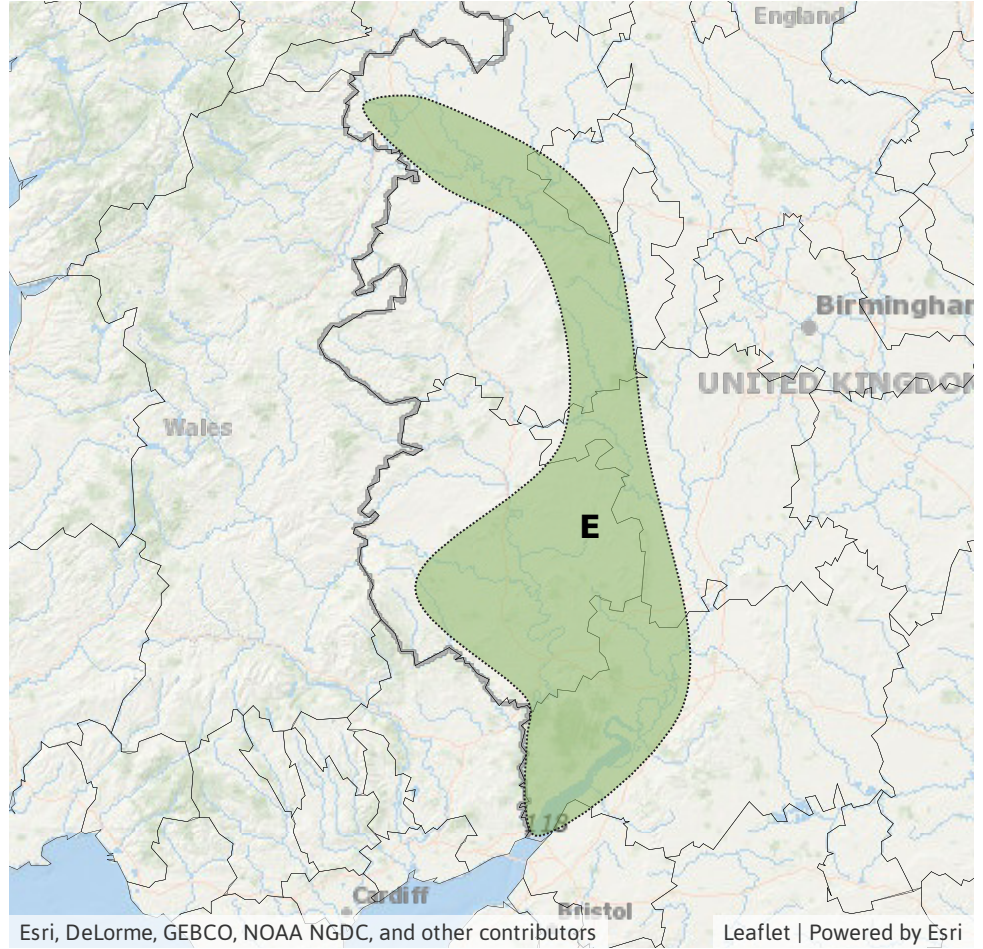

Specific Areas of Concern Map 3: Monday 28 and Tuesday 29 October 2019

RISK AREA E
Impact **MINOR**
Likelihood **LOW**

Source River
Likely duration 2 Days

River Severn on Monday and Tuesday and river Wye on Monday.

Assessment of flood risk

Rivers

The river flood risk is LOW today (Saturday) and tomorrow.

Significant river flooding is possible but not expected across parts of Wales and England today, with minor river flooding impacts probable into tomorrow over the Midlands.

Ongoing minor river flooding impacts are possible in parts of the Midlands and north-east England into Tuesday.

Surface water

The surface water flood risk is LOW today (Saturday).

Significant surface water flooding impacts are possible but not expected in south Wales and in parts of England. This is due to the possibility of further heavy rain across these areas today. Strong winds may exacerbate surface water issues across the south of England and south Wales due to leaf fall blocking drains.

Coastal/Tidal

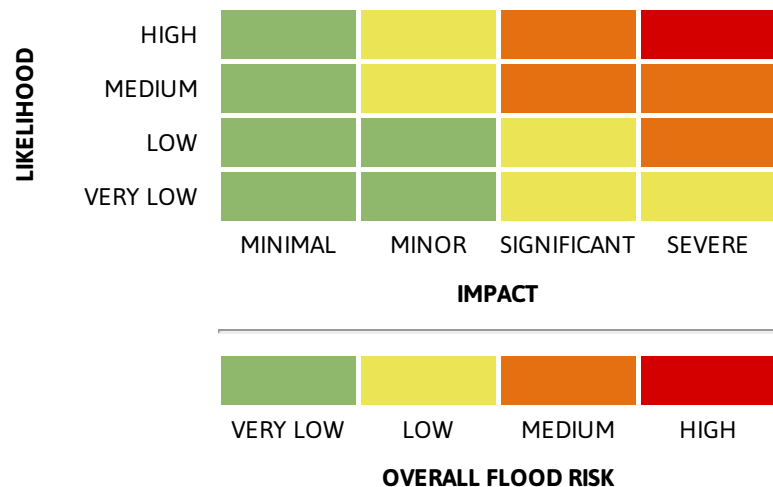

The coastal/tidal flood risk is VERY LOW for the next five days, despite large spring tides reaching their highest levels on Tuesday.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Sunday 27 October 2019 (all times are local)**
