Significant river and surface water flooding is possible but not expected today (Saturday) across parts of Wales and the south-west of England. Significant river flooding impacts continue tomorrow in parts of Wales. The overall flood risk is LOW.

## Specific Areas of Concern Map 1: Saturday 02 November 2019

**RISK AREA A**  
Impact **SIGNIFICANT**  
Likelihood **VERY LOW**

Source River Surface  
Likely duration 1 Day

Significant surface water & river impacts, not including rivers in Gloucestershire.

**RISK AREA B**  
Impact **MINOR**  
Likelihood **LOW**

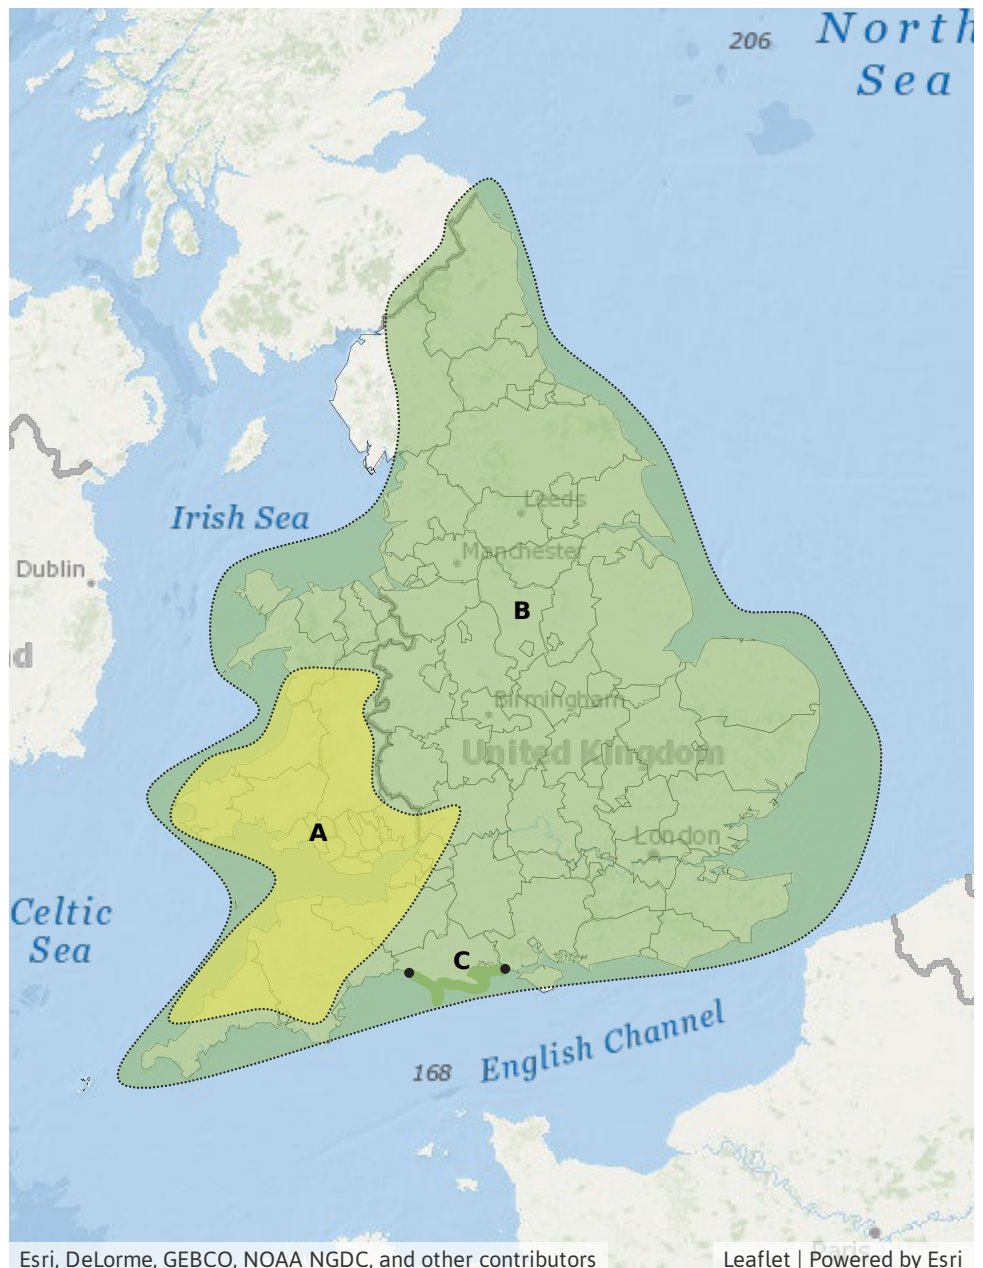

Source River Surface  
Likely duration 2 Days

Successive bands of rain over the weekend falling onto saturated ground.

**RISK AREA C**  
Impact **MINOR**  
Likelihood **LOW**

Source Coastal/Tidal  
Likely duration 1 Day

Minor coastal flooding impacts around high tide.

# Flood Guidance Statement

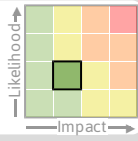

10:30hrs Saturday 02 November 2019

### Specific Areas of Concern Map 2: Sunday 03 November 2019.

#### RISK AREA B

Impact **MINOR**

Likelihood **LOW**

Source River Surface

Likely duration 2 Days

Successive bands of rain over the weekend falling onto saturated ground.

#### RISK AREA D

Impact **SIGNIFICANT**

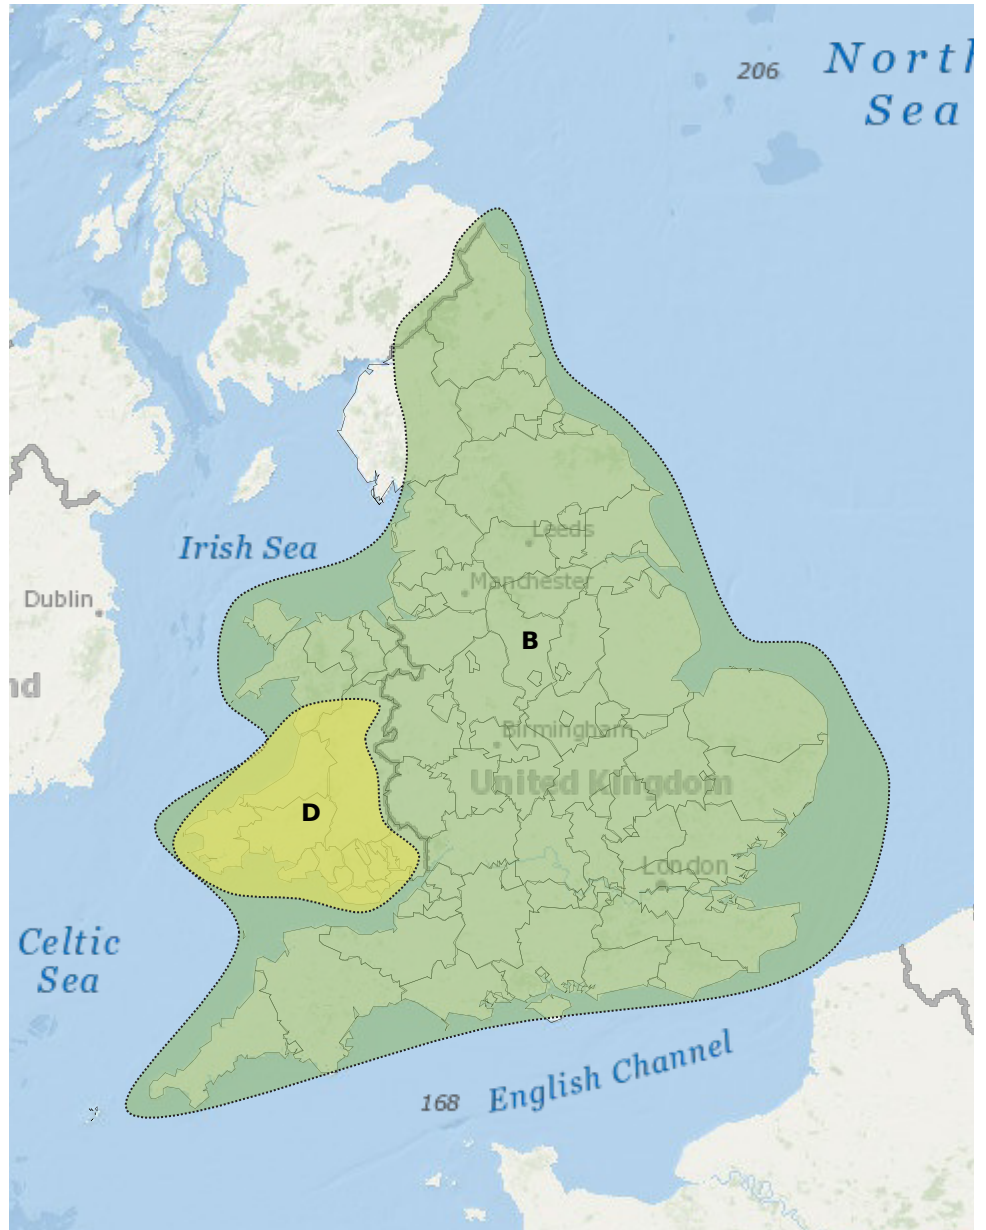

Likelihood **VERY LOW**

Source River

Likely duration 1 Day

Significant river flooding impacts on Sunday.

# Flood Guidance Statement

10:30hrs Saturday 02 November 2019

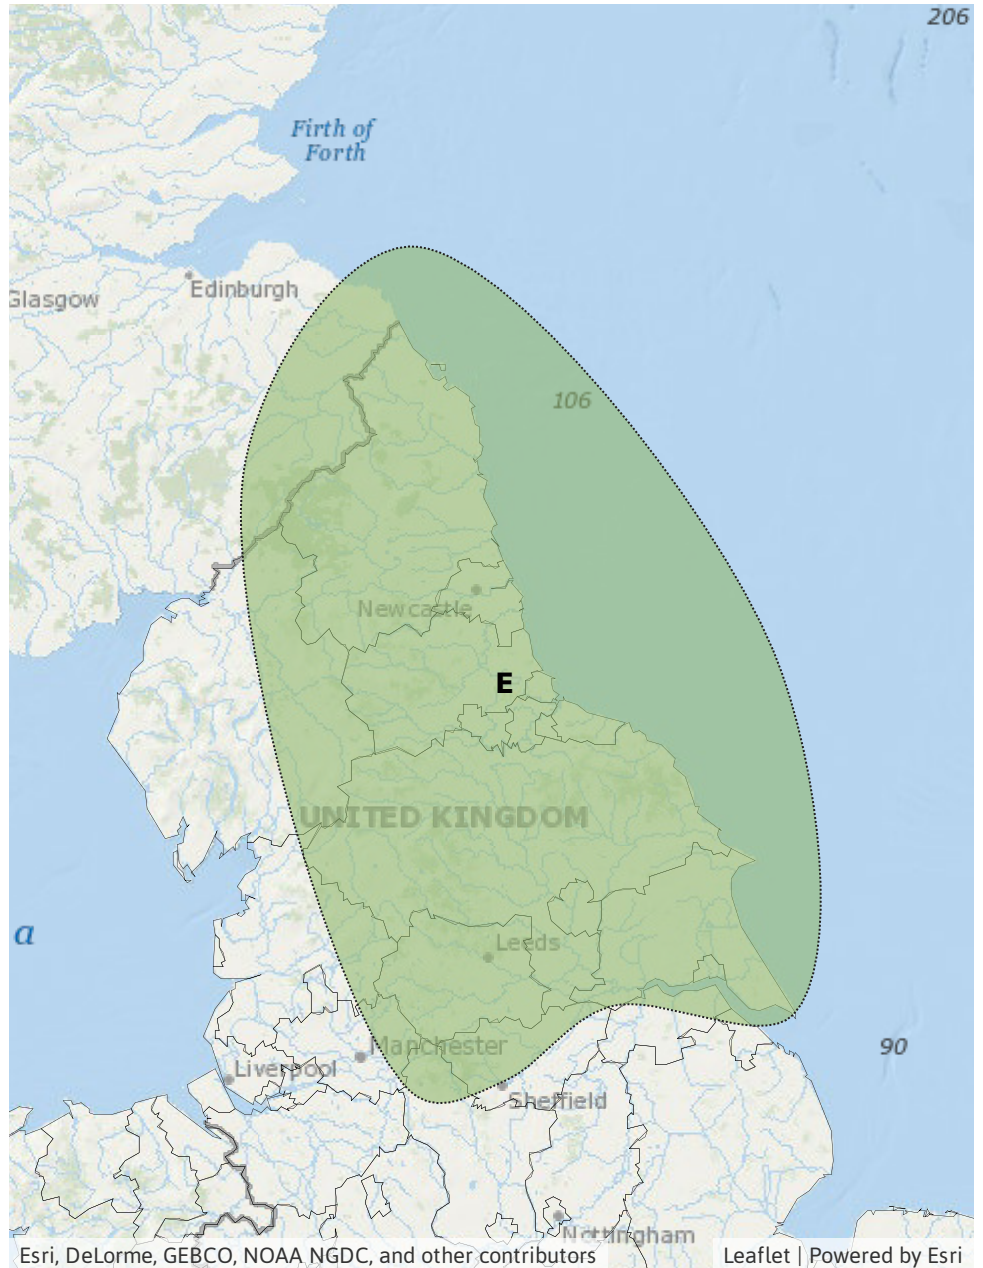

### Specific Areas of Concern Map 3: Monday 04 November 2019

**RISK AREA E**  
Impact **MINOR**  
Likelihood **LOW**

Source River Surface  
Likely duration 1 Day

Risk of persistent rain on Monday.

### Assessment of flood risk

#### Rivers

---

The river flood risk is LOW.

Significant river flooding is possible but not expected in parts of Wales and parts of the south-west of England today (Saturday), continuing on Sunday in parts of Wales.

Minor river flooding impacts are possible more widely across England and Wales until Tuesday, and particularly in the north-east of England on Monday. This is due to successive bands of heavy rainfall falling on saturated catchments.

#### Surface water

---

The surface water flood risk is LOW.

Significant surface water flooding is possible but not expected across parts of Wales and the south-west of England today (Saturday). Minor surface water flooding impacts are possible more widely across England and Wales until Tuesday, and particularly in the north-east of England on Monday. This is due to successive bands of rain and showers falling on already saturated ground. Leaf fall is likely to block drains and impede drainage in places which will increase the potential for surface water flooding locally.

#### Coastal/Tidal

---

The coastal/tidal flood risk is VERY LOW.

Local minor coastal flooding impacts are possible along the Dorset coast today (Saturday) and possible but not expected more widely today (Saturday) and early tomorrow along the south and south-west coasts of England and Wales due to severe gales and large waves.

#### Groundwater

---

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

**MINIMAL**

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

**MINOR**

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

**SIGNIFICANT**

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

**SEVERE**

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible

Next statement due **10:30hrs Sunday 03 November 2019 (all times are local)**
