Ongoing significant river flooding impacts are expected in parts of South Yorkshire today and tomorrow, with minor impacts elsewhere. The overall flood risk is **MEDIUM**. See end of FGS for 6-10 day forecast.

Specific Areas of Concern Map 1: Saturday 9 and Sunday 10 November 2019

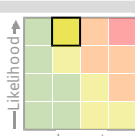

RISK AREA A
Impact **SIGNIFICANT**
Likelihood **HIGH**

Source River
Likely duration 2 Days

Ongoing significant impacts on Saturday and Sunday reducing to minor on Monday.

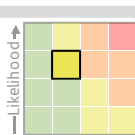

RISK AREA B
Impact **MINOR**
Likelihood **HIGH**

Source River
Likely duration 1 Day

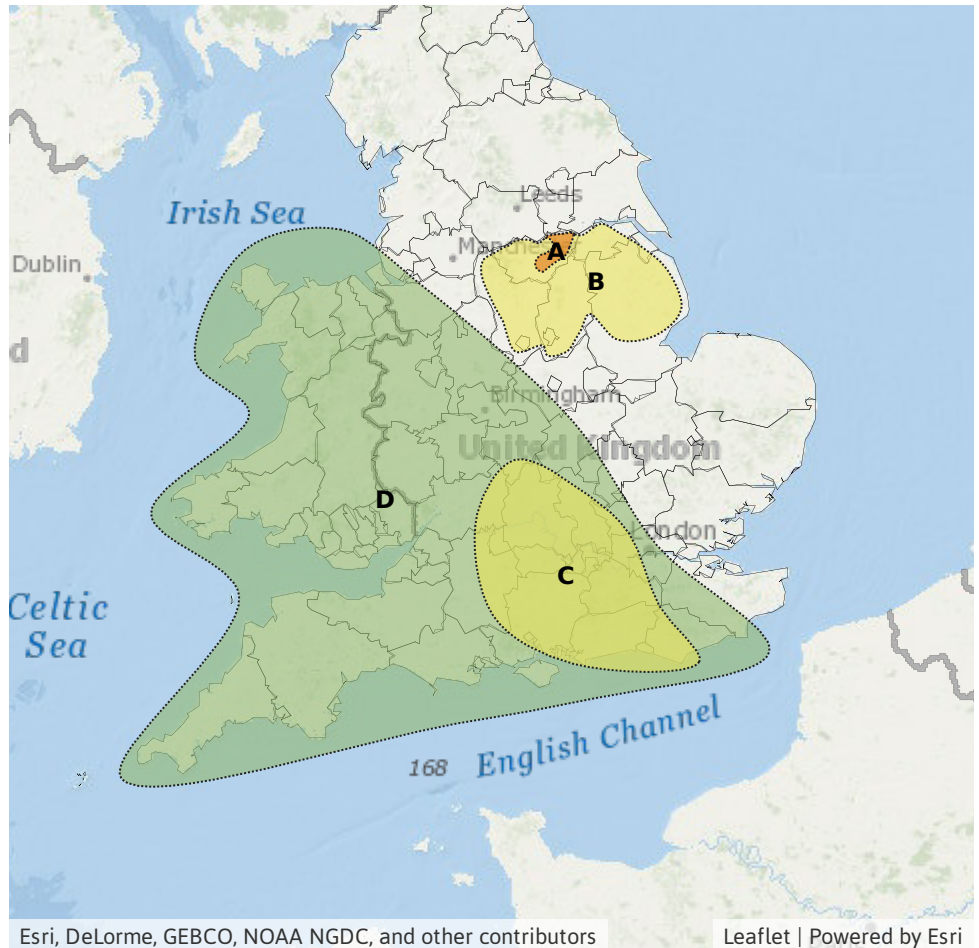

Continuing on Sunday in Nottinghamshire and Derbyshire only.

RISK AREA C
Impact **MINOR**
Likelihood **MEDIUM**

Source River Surface
Likely duration 2 Days

Leaf fall is likely to block drains and impede drainage increasing the flood risk.

Flood Guidance Statement

10:30hrs Saturday 09 November 2019

Specific Areas of Concern Map 2: Monday 11 to Wednesday 13 November

RISK AREA E
Impact **MINOR**
Likelihood **HIGH**

Source River
Likely duration 1 Day

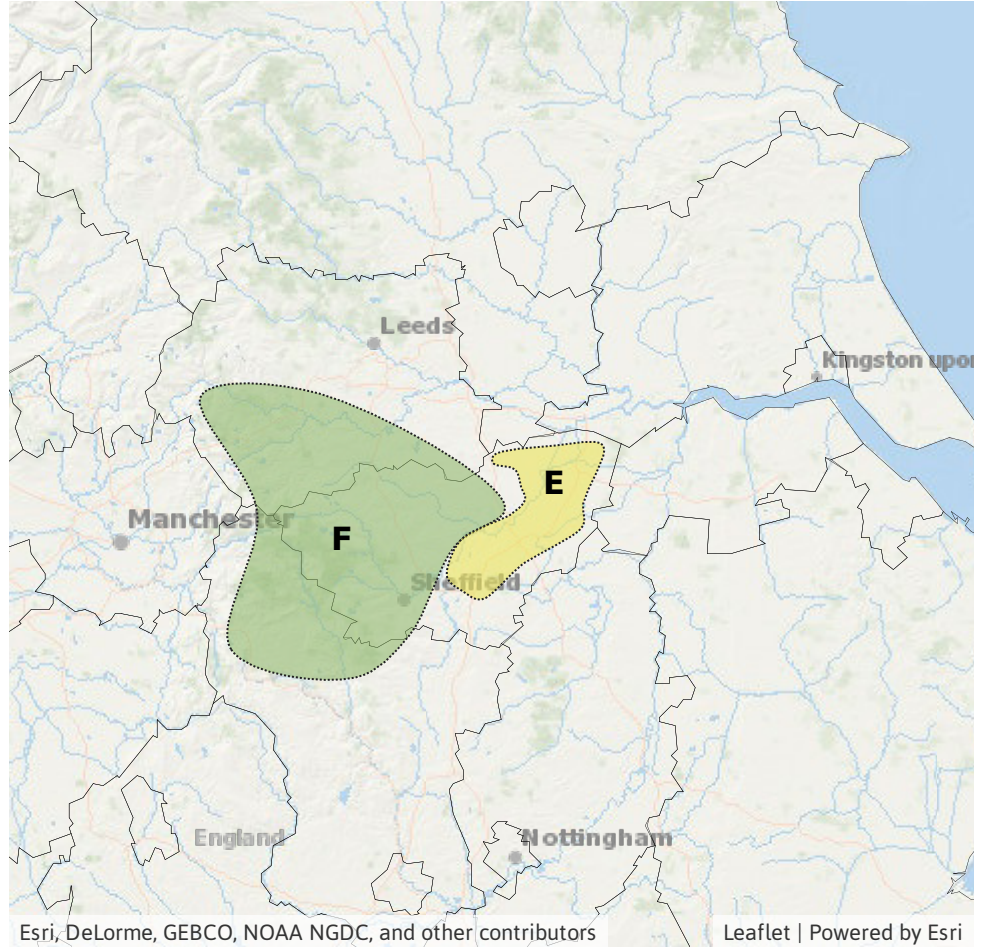

Ongoing impacts due to previous rainfall.

RISK AREA F
Impact **MINOR**
Likelihood **LOW**

Source River Surface
Likely duration 3 Days

Local flooding from frequent showers starting Monday through to Wednesday.

Assessment of flood risk

Rivers

The river flood risk is MEDIUM today (Saturday) and Sunday and is LOW on Monday.

Ongoing significant river flooding impacts are expected today and tomorrow around the River Don, reducing to minor impacts on Monday. Minor impacts are expected elsewhere in South Yorkshire, Derbyshire, Nottinghamshire and Lincolnshire today, and on Sunday in Nottinghamshire only. Minor impacts are also possible on Sunday in Derbyshire. This is a response to previous rainfall.

Minor river flooding impacts are probable over central and southern parts of England, and possible but not expected more widely across parts of England and Wales today (Saturday) and into Sunday.

Minor river flooding impacts are possible over parts of South and West Yorkshire and Derbyshire from Monday to Wednesday, and are possible but not expected in other western parts of England and Wales. This is due to frequent showers falling on already saturated ground.

Surface water

The surface water flood risk is LOW for today (Saturday) and into Sunday.

Minor surface water flooding is probable over central and southern parts of England, and possible more widely across parts of England and Wales today (Saturday) and into Sunday.

Minor surface water flooding impacts are possible over parts of South and West Yorkshire and Derbyshire from Monday to Wednesday, and are possible but not expected in other western parts of England and Wales. This is due to frequent showers falling on already saturated ground.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Minor groundwater flooding impacts are possible in Lincolnshire around the River Humber today.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW despite strong winds and large waves at times.

6-10 day forecast

River and surface water flooding impacts could occur if forecast heavy rain during this period falls on already saturated catchments.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **15:00hrs Saturday 09 November 2019 (all times are local)**
