Ongoing significant river flooding impacts are expected in parts of South Yorkshire until Monday, with minor impacts elsewhere. The overall flood risk is MEDIUM. See end of FGS for 6-10 day forecast.

## Specific Areas of Concern Map 1: Saturday 9 and Sunday 10 November 2019

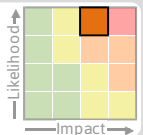

# Flood Guidance Statement

15:30hrs Saturday 09 November 2019

## Specific Areas of Concern Map 2: Monday 11 November

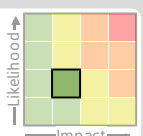

**RISK AREA A**  
Impact **SIGNIFICANT**  
Likelihood **HIGH**

Source River  
Likely duration 3 Days

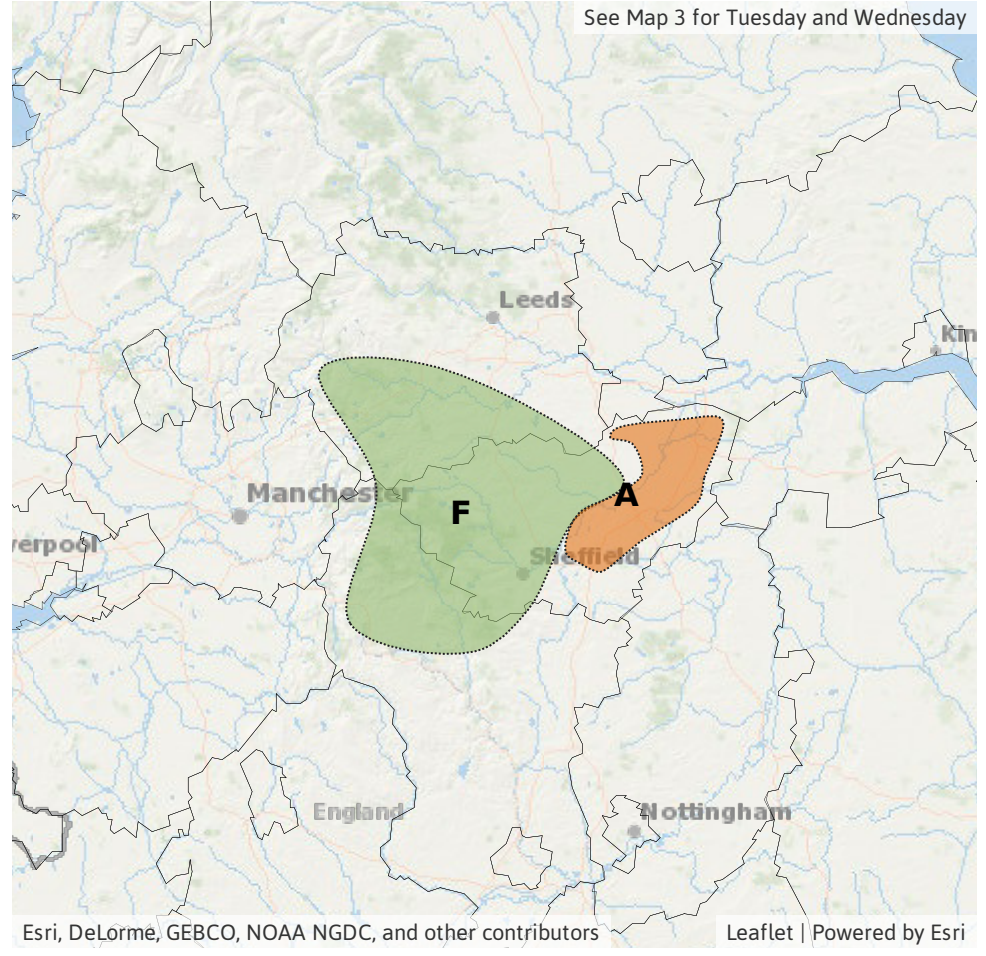

Ongoing significant impacts Saturday, Sunday and Monday.

**RISK AREA F**  
Impact **MINOR**  
Likelihood **LOW**

Source River Surface  
Likely duration 3 Days

Local flooding from frequent showers starting Monday through to Wednesday.

## Specific Areas of Concern Map 3: Tuesday 12 and Wednesday 13 November

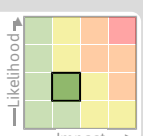

**RISK AREA E**  
Impact **MINOR**  
Likelihood **HIGH**

Source River  
Likely duration 2 Days

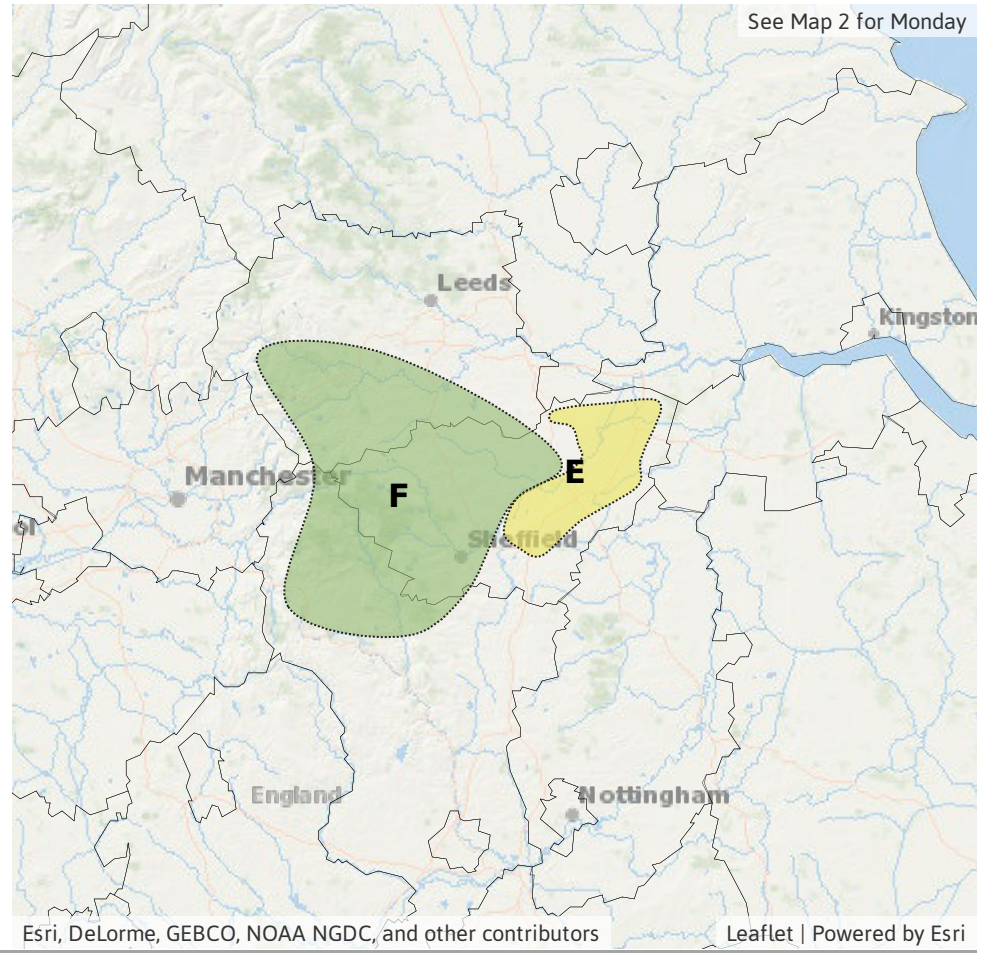

Ongoing impacts due to previous rainfall.

**RISK AREA F**  
Impact **MINOR**  
Likelihood **LOW**

Source River Surface  
Likely duration 3 Days

Local flooding from frequent showers starting Monday through to Wednesday.

## Assessment of flood risk

### Rivers

---

The river flood risk is MEDIUM today (Saturday) through to Monday and is LOW on Tuesday and Wednesday.

Ongoing significant river flooding impacts are expected through until Monday around the River Don, reducing to minor impacts on Tuesday and Wednesday. Minor impacts are expected elsewhere in South Yorkshire, Derbyshire, Nottinghamshire and Lincolnshire today, and on Sunday in Nottinghamshire only. Minor impacts are also possible on Sunday in Derbyshire. This is a response to previous rainfall.

Minor river flooding impacts are probable over central and southern parts of England, and possible but not expected more widely across parts of England and Wales today (Saturday) and into Sunday.

Minor river flooding impacts are possible over parts of South and West Yorkshire and Derbyshire from Monday to Wednesday, and are possible but not expected in other western parts of England and Wales. This is due to frequent showers falling on already saturated ground.

### Surface water

---

The surface water flood risk is LOW for today (Saturday) and into Sunday.

Minor surface water flooding is probable over central and southern parts of England, and possible more widely across parts of England and Wales today (Saturday) and into Sunday.

Minor surface water flooding impacts are possible over parts of South and West Yorkshire and Derbyshire from Monday to Wednesday, and are possible but not expected in other western parts of England and Wales. This is due to frequent showers falling on already saturated ground.

### Groundwater

---

The groundwater flood risk is VERY LOW for the next five days.

Minor groundwater flooding impacts are possible in Lincolnshire around the River Humber today.

### Coastal/Tidal

---

The coastal/tidal flood risk is VERY LOW despite strong winds and large waves at times.

### 6-10 day forecast

River and surface water flooding impacts could occur if forecast heavy rain during this period falls on already saturated catchments.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible

Next statement due **10:30hrs Sunday 10 November 2019 (all times are local)**
