Minor coastal flooding impacts are probable today and minor groundwater flooding impacts are probable over the next five days. The overall flood risk is **LOW**.

## Specific Areas of Concern Map 1: Thursday 28 November.

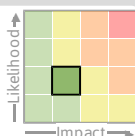

**RISK AREA A**  
Impact **MINOR**  
Likelihood **HIGH**

Source Ground  
Likely duration 5 + Days

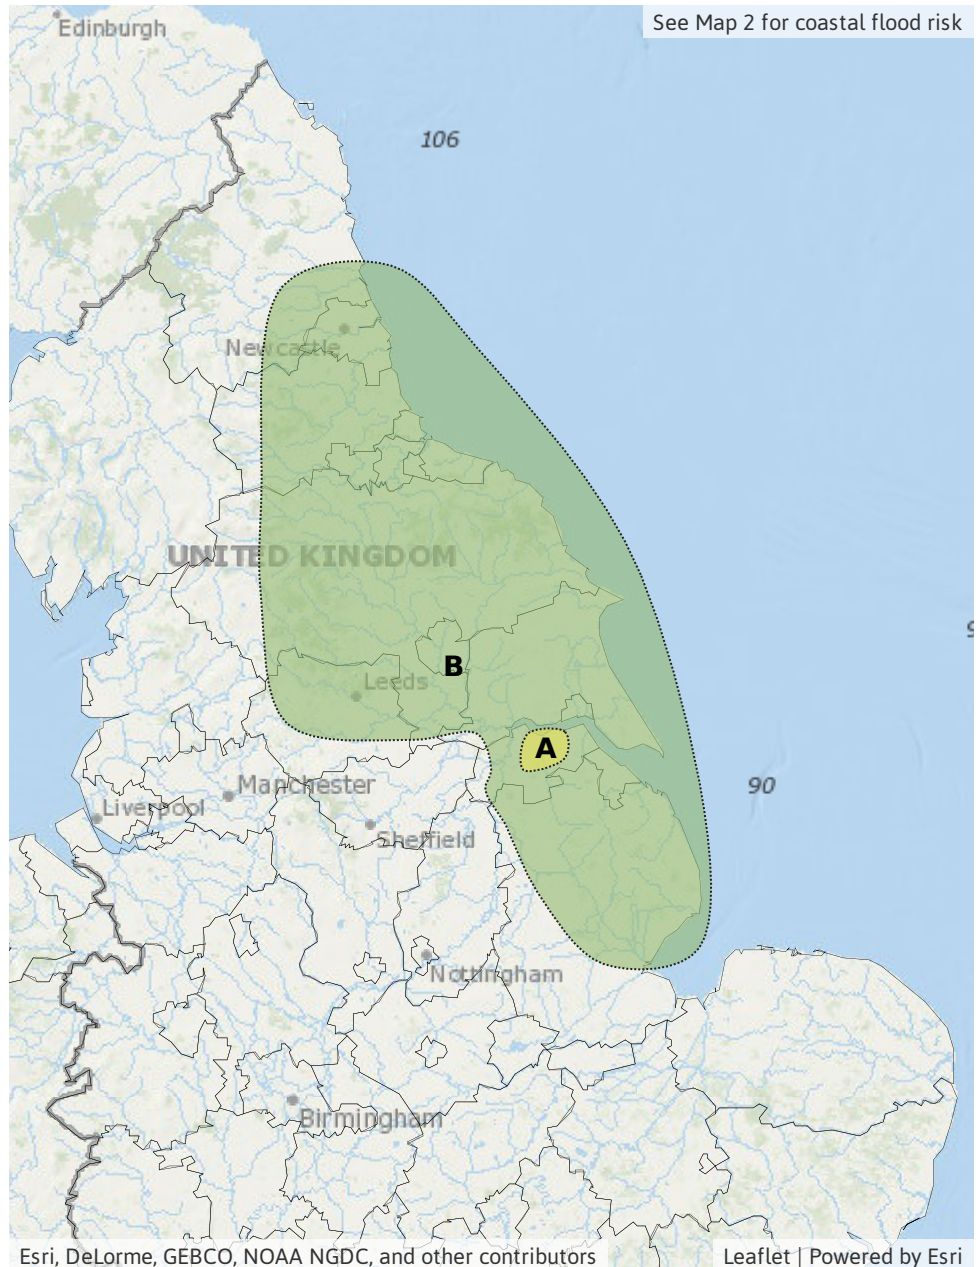

Minor impacts from groundwater flooding for at least the next five days.

**RISK AREA B**  
Impact **MINOR**  
Likelihood **LOW**

Source River  
Likely duration 1 Day

Ongoing impacts from rain that has already fallen.

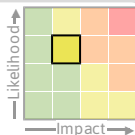

# Flood Guidance Statement

10:30hrs Thursday 28 November 2019

## Specific Areas of Concern Map 2: Thursday 28 and Friday 29 November.

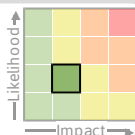

**RISK AREA C**  
 Impact **MINOR**  
 Likelihood **MEDIUM**

Source Coastal/Tidal  
 Likely duration 1 Day

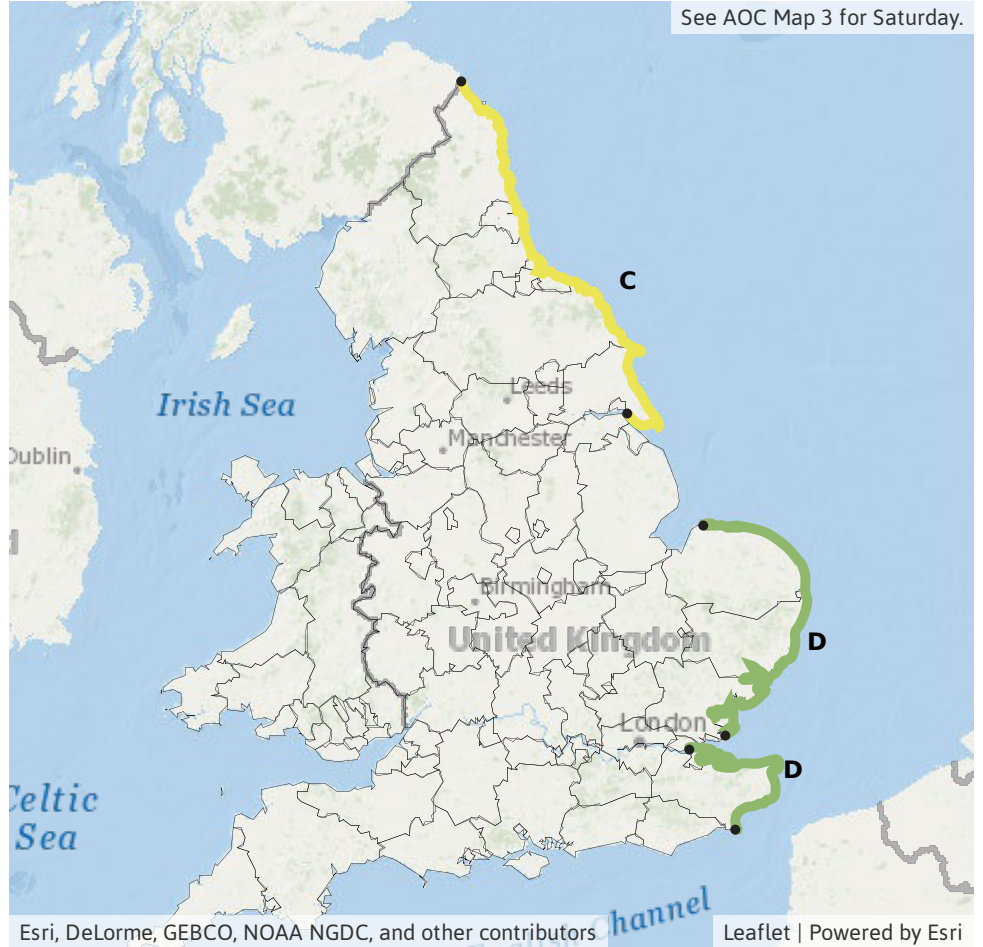

Minor impacts probable at high tides today and possible on Friday.

**RISK AREA D**  
 Impact **MINOR**  
 Likelihood **LOW**

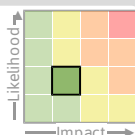

Source Coastal/Tidal  
 Likely duration 2 Days

Local minor coastal impacts possible around high tides today and Friday.

## Specific Areas of Concern Map 3: Saturday 30 November

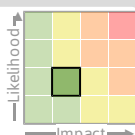

**RISK AREA E**  
 Impact **MINOR**  
 Likelihood **LOW**

Source River Surface  
 Likely duration 1 Day

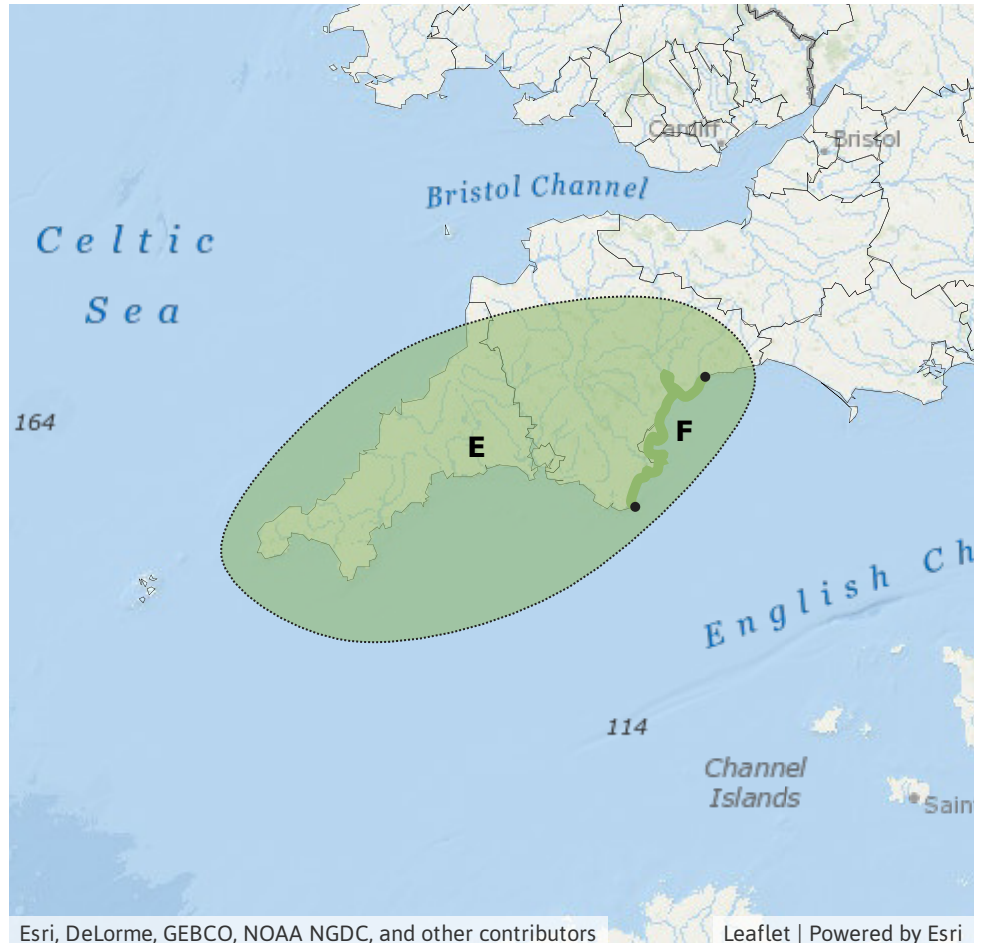

Heavy frontal rain with strong easterly winds falling on saturated ground.

**RISK AREA F**  
 Impact **MINOR**  
 Likelihood **LOW**

Source Coastal/Tidal  
 Likely duration 1 Day

Easterly winds causing onshore waves may give localised minor impacts.

## Assessment of flood risk

### Coastal/Tidal

---

The coastal/tidal flood risk is LOW today (Thursday).

Minor coastal flooding impacts are probable along the Yorkshire and North East coasts today (Thursday) and are possible on Friday. Minor coastal impacts are also possible along other parts of the east coast of England today and on Friday. This is primarily due to high tides. There may also be instances of wave and spray over-topping in places.

Localised minor coastal impacts are possible on east-facing parts of the south coast of Devon on Saturday due to the potential for strong easterly winds to create waves that are directed onshore.

### Groundwater

---

The groundwater flood risk is LOW for the next five days.

Minor groundwater flooding impacts are expected to continue in parts of North Lincolnshire during the next five days.

### Rivers

---

The river flood risk is VERY LOW for the next five days.

Minor ongoing river flooding impacts are possible in parts of the north and east of England today due to rain that has already fallen.

Minor river flooding impacts are possible in parts of south-west England on Saturday due to the potential for heavy and persistent frontal rain falling on already saturated river catchments.

### Surface water

---

The surface water flood risk is VERY LOW on Saturday.

Minor surface water flooding impacts are possible in parts of south-west England on Saturday due to the potential for heavy and persistent frontal rain falling on already saturated ground.

### Flood risk matrix

### Summary of potential impacts

**MINIMAL**

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

**MINOR**

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

**SIGNIFICANT**

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

**SEVERE**

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible

Next statement due **10:30hrs Friday 29 November 2019 (all times are local)**
