Steady

Groundwater levels remain high in parts of England. The overall flood risk is VERY LOW.

Assessment of flood risk

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Groundwater levels remain high in Hampshire, Dorset, Wiltshire, North Lincolnshire, East Sussex, West Sussex and Brighton and Hove although impacts are minimal.

Rivers

The river flood risk is VERY LOW for the next five days.

Rivers are still locally high in parts of England due to previous rainfall, however only minimal impacts are expected.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Coastal/Tidal

The coastal / tidal flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Tuesday 21 January 2020

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
