--	---	---

RISK AREA D
Impact **SIGNIFICANT**
Likelihood **VERY LOW**

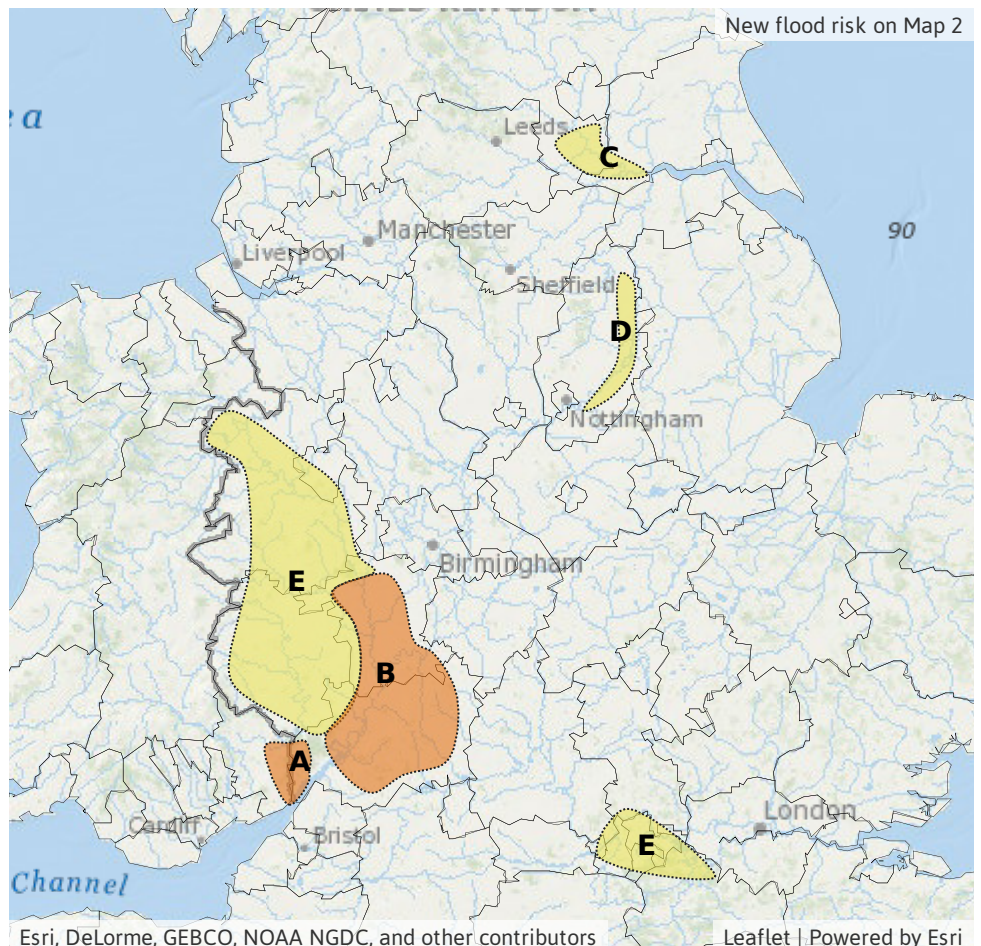

Source River
Likely duration 3 Days

Ongoing river flooding on the Trent through Nottinghamshire Wed to Fri.

RISK AREA E
Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 2 Days

Ongoing flooding, becoming increasingly confined to lower River Severn.

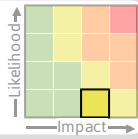

Flood Guidance Statement

15:00hrs Wednesday 19 February 2020

Specific Areas of Concern Map 2: Wednesday 19 (pm) and Thursday 20 February

RISK AREA D

Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River
Likely duration 3 Days

Ongoing river flooding on the Trent through Nottinghamshire Wed to Fri.

RISK AREA E

Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 2 Days

Ongoing minor river flooding.

RISK AREA F

Impact **SIGNIFICANT**
Likelihood **LOW**

Source River
Likely duration 4 Days

Significant river flooding lower River Severn until Sat becoming minor on Sun.

RISK AREA G

Impact **SIGNIFICANT**
Likelihood **LOW**

Source River Surface
Likely duration 2 Days

Rain falling on responsive catchments in Wales

RISK AREA H

Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River Surface
Likely duration 2 Days

Heavy rain may cause flooding impacts

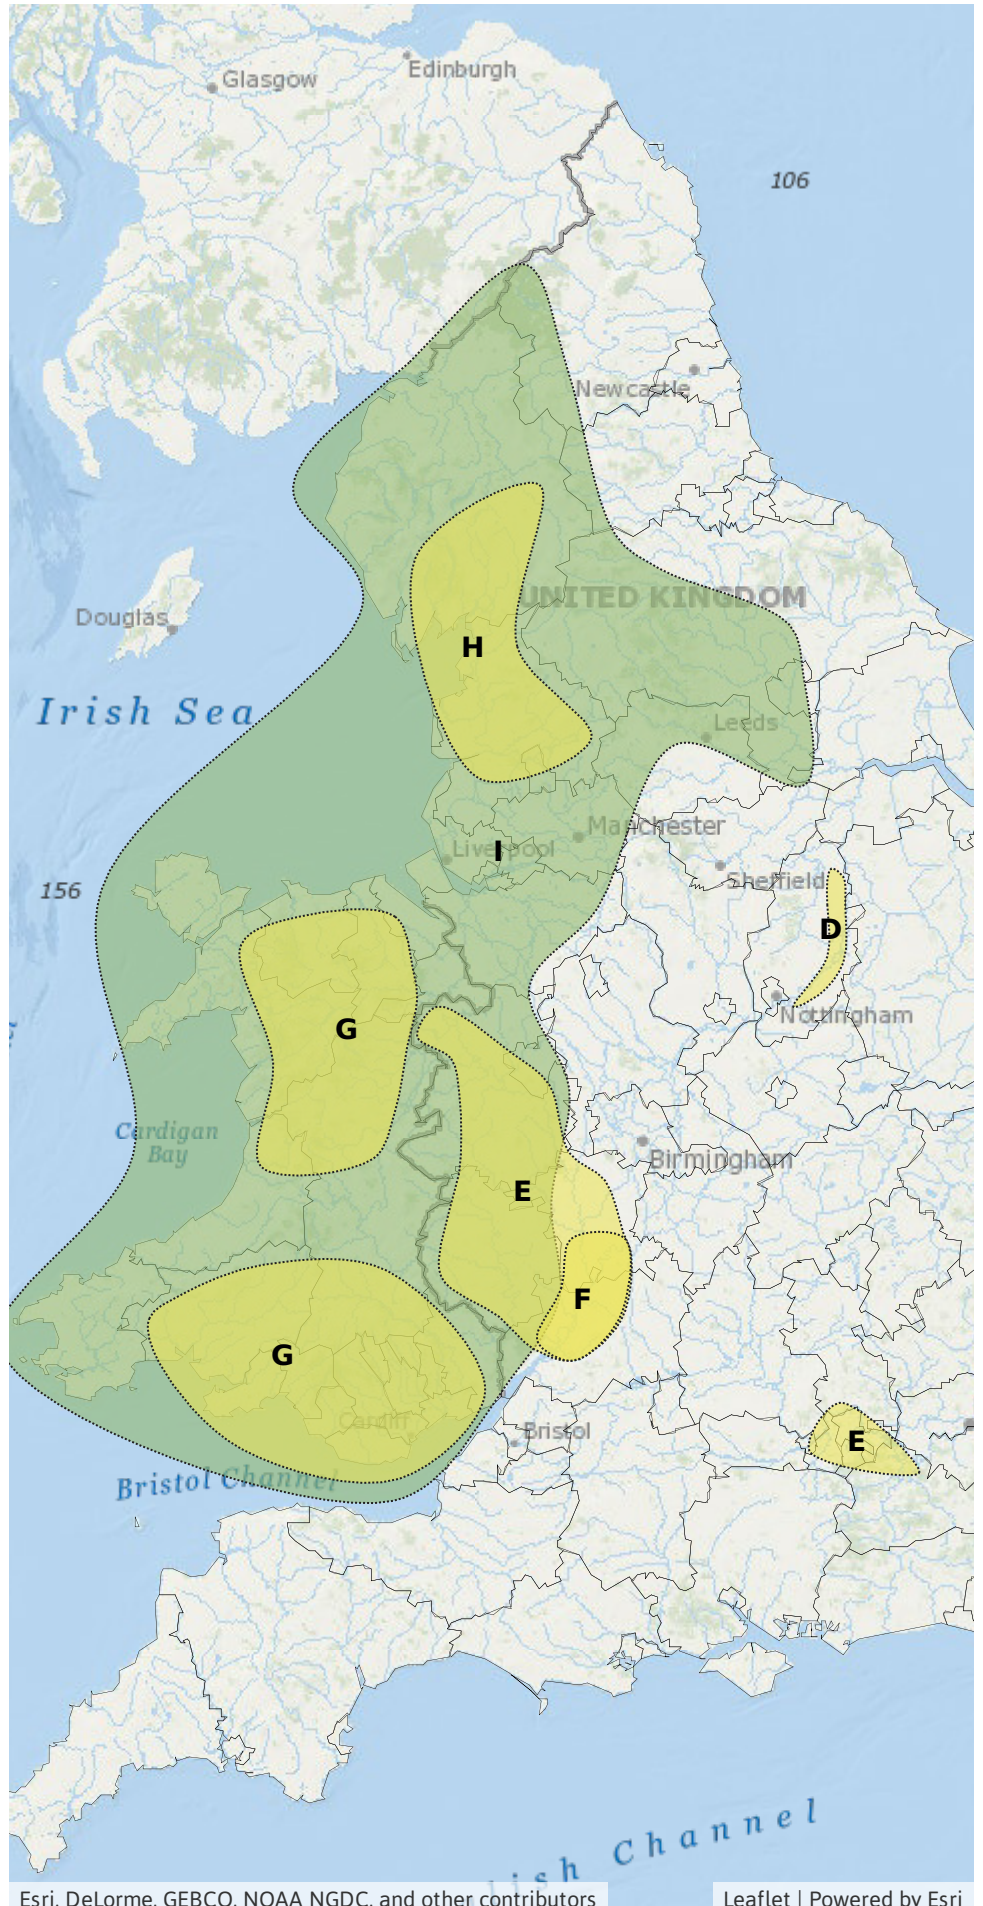

RISK AREA I

Impact **MINOR**
Likelihood **LOW**

Source River Surface
Likely duration 2 Days

Rain falling on very responsive and saturated catchments.

Flood Guidance Statement

15:00hrs Wednesday 19 February 2020

Specific Areas of Concern Map 3: Friday 21 to Saturday 22 February

RISK AREA D
Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River
Likely duration 3 Days

Ongoing river flooding on the Trent through Nottinghamshire Wed to Fri.

RISK AREA F
Impact **SIGNIFICANT**
Likelihood **LOW**

Source River
Likely duration 4 Days

Significant river flooding lower River Severn until Sat becoming minor on Sun.

RISK AREA J
Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River Surface
Likely duration 3 Days

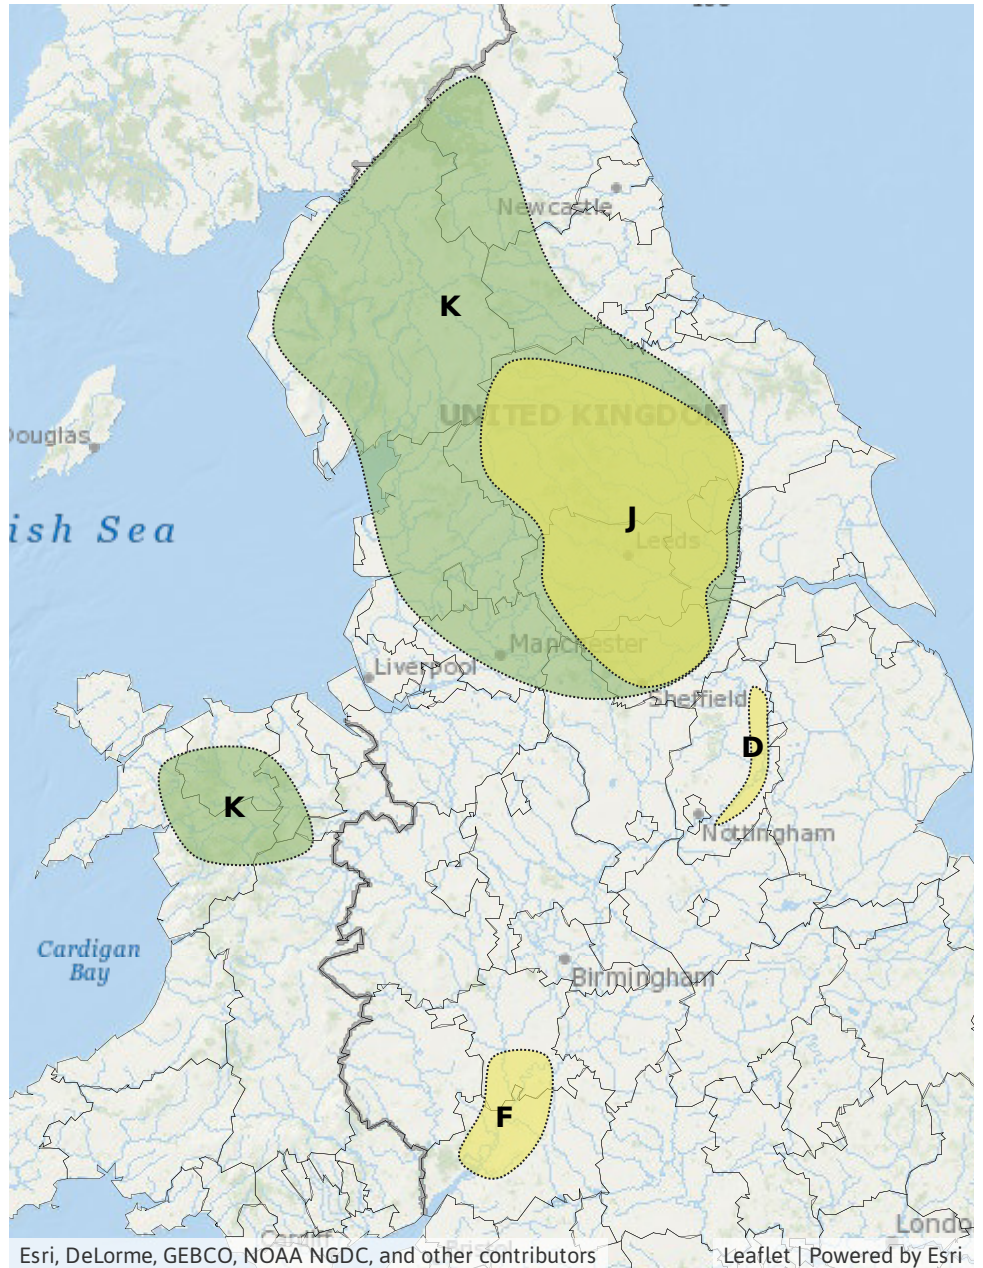

Heavy rain Fri to Sat leading to renewed flooding impacts.

RISK AREA K
Impact **MINOR**
Likelihood **LOW**

Source River Surface
Likely duration 2 Days

Rain Fri to Sat falling on very responsive and saturated catchments.

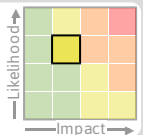

Flood Guidance Statement

15:00hrs Wednesday 19 February 2020

Specific Areas of Concern Map 4: Sunday 23 February

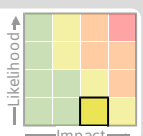

RISK AREA F
Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 4 Days

Minor ongoing river flooding on the lower River Severn on Sunday.

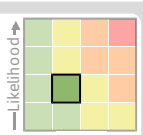

RISK AREA J
Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River
Likely duration 3 Days

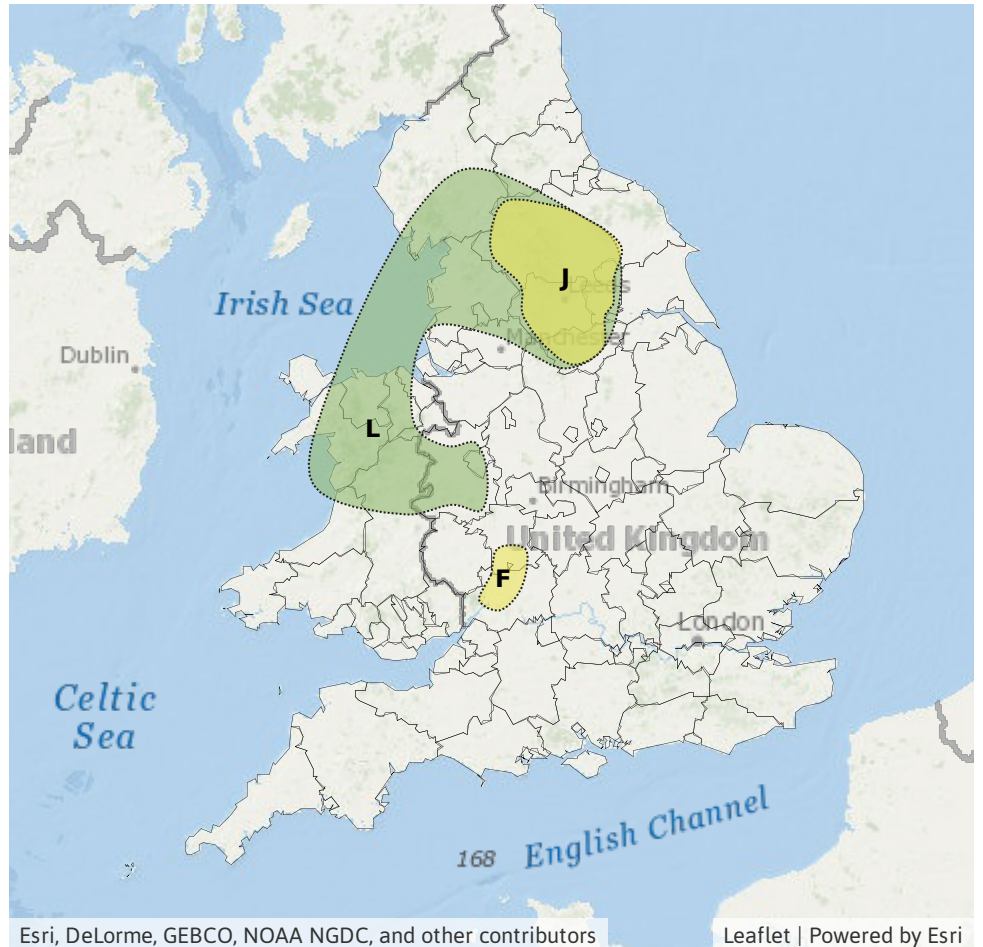

Potential for ongoing & renewed river flooding impacts.

RISK AREA L
Impact **MINOR**
Likelihood **LOW**

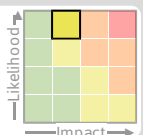

Source River Surface
Likely duration 1 Day

Further heavy rain may exacerbate existing flooding

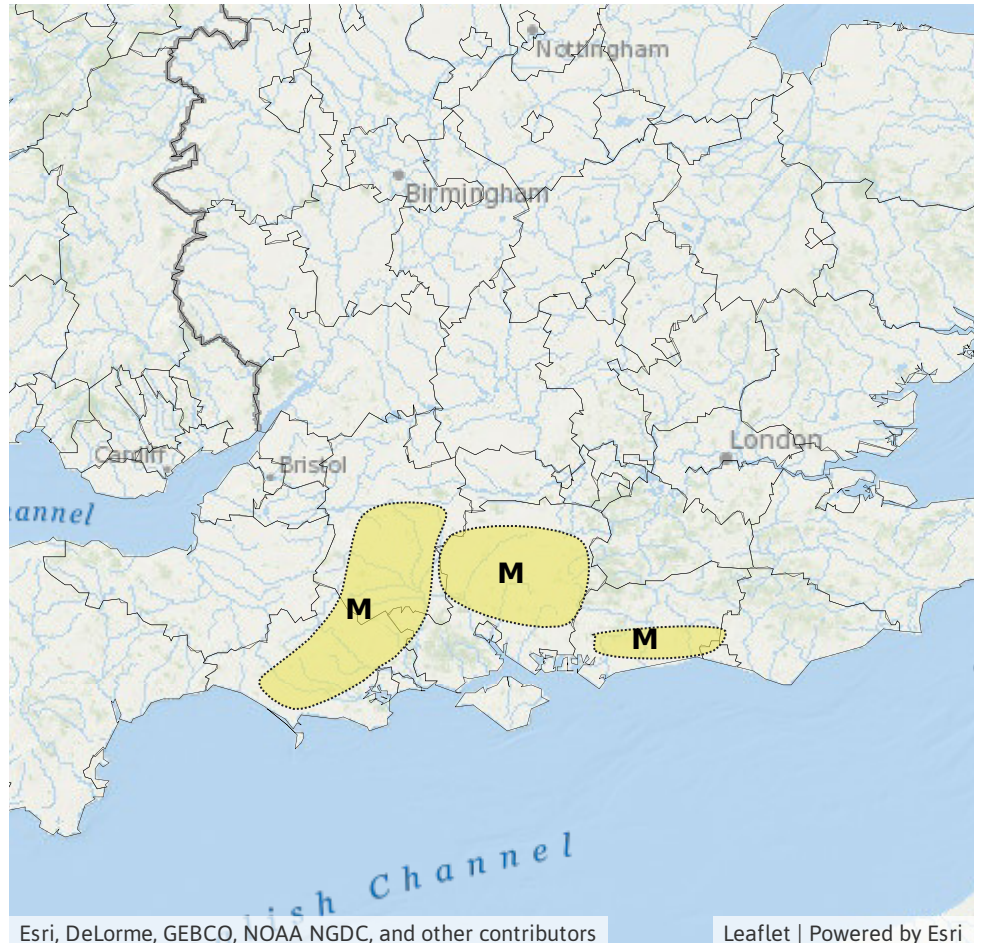

Specific Areas of Concern Map 5: Wednesday 19 to Sunday 23 February 2020

RISK AREA M
Impact **MINOR**
Likelihood **HIGH**

Source Ground
Likely duration 5 + Days

Localised groundwater flooding impacts for at least the next five days.

Assessment of flood risk

Rivers

The overall river flood risk is MEDIUM.

Ongoing significant river flooding impacts are expected on the Rivers Severn, lower Avon (Gloucestershire) and lower Wye today (Wednesday). Ongoing river flooding impacts are probable for the lower Severn and across several other catchments across England, some continuing throughout the next five days - see maps for details.

New significant river flooding impacts are possible across parts of Wales and north west England later today and on Thursday, due to heavy rain on already saturated catchments. Minor river flooding impacts are also possible more widely across these areas.

Further spells of rain into northern England and Wales from Friday onwards may lead to further significant river flooding impacts in some of these areas, with minor impacts possible more widely. See maps for details.

Surface water

The overall surface water flood risk is LOW.

Significant surface water flooding impacts are possible across parts of Wales and north-west England later today and on Thursday, due to heavy rain falling on saturated ground. Minor flooding impacts are also possible more widely.

Further significant surface water impacts are possible but not expected for parts of the north of England on Friday and into Saturday due to heavy rain on saturated ground. Minor impacts are possible elsewhere in the north of England and the north of Wales on Friday to Saturday, and again on Sunday. See maps for details.

Groundwater

The groundwater flood risk is LOW for the next five days.

Minor groundwater flooding impacts are expected in parts of the south of England for at least the next five days. Groundwater levels also remain high in parts of North Lincolnshire, although impacts are currently minimal.

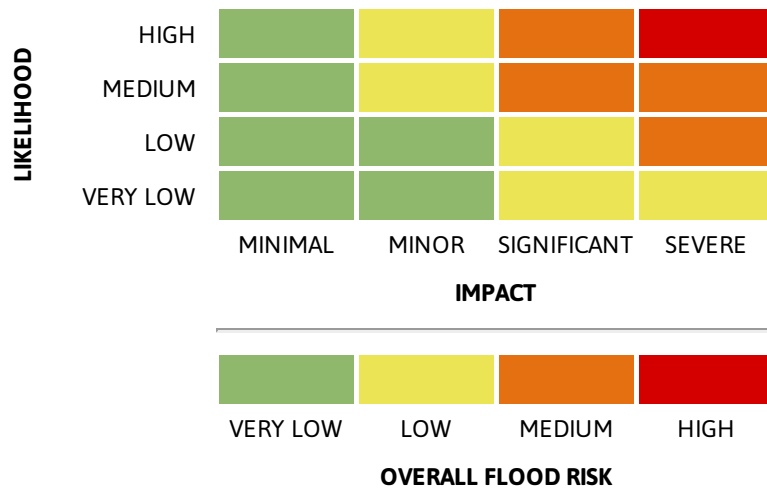

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days. Large waves and strong winds will affect some coasts at times but only minimal impacts are expected.

6-10 day forecast

Further heavy rain is possible in this period. This may fall on sensitive catchments that are currently flooded leading to a risk of further flooding impacts.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Thursday 20 February 2020 (all times are local)**
