Ongoing significant flooding impacts on the lower River Aire and the River Severn. The overall flood risk is **MEDIUM**. See end of FGS for 6-10 day forecast.

Specific Areas of Concern Map 1: Saturday 29 February (North England only)

RISK AREA A

Impact **SIGNIFICANT**
Likelihood **HIGH**

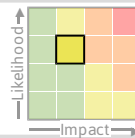

Source River
Likely duration 5 + Days

Significant river flooding impacts for the Lower Aire washlands next five days.

RISK AREA C

Impact **MINOR**
Likelihood **MEDIUM**

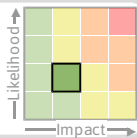

Source River
Likely duration 5 + Days

Ongoing flooding through York and in the washlands of the Rivers Aire and Ouse.

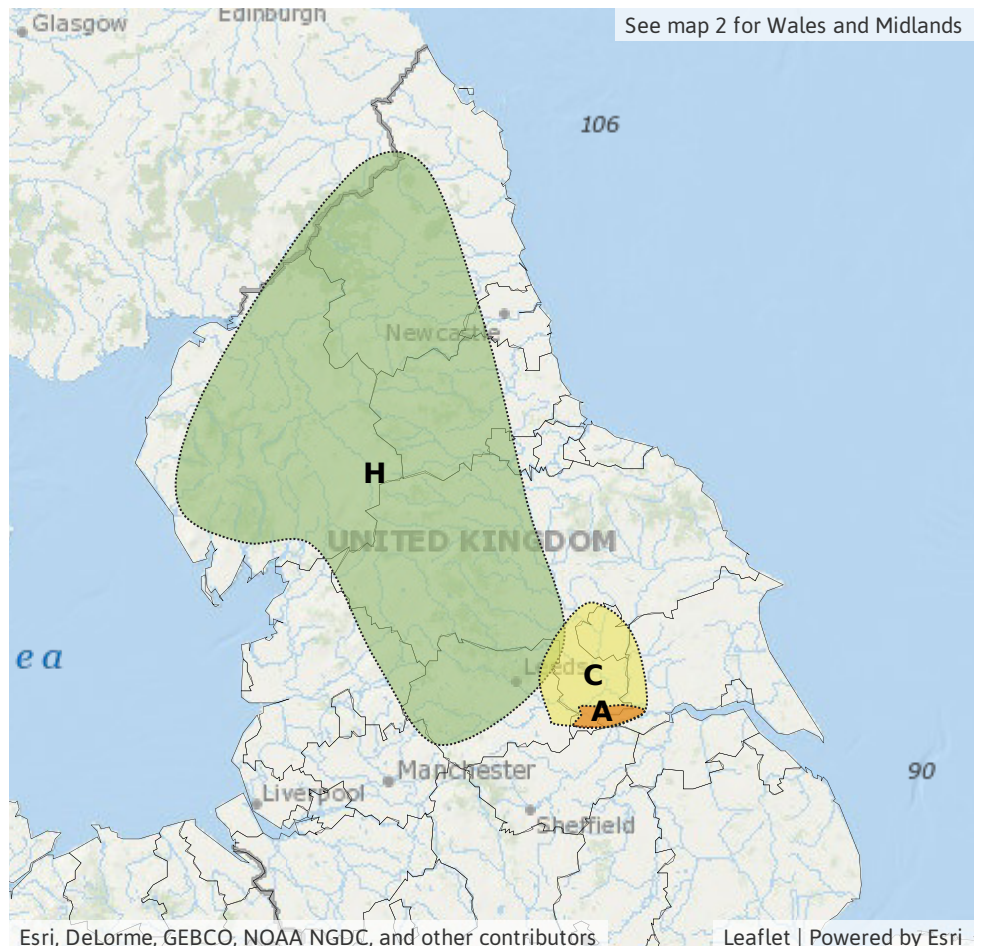

RISK AREA H

Impact **MINOR**
Likelihood **LOW**

Source River Surface
Likely duration 2 Days

Impacts possible later Saturday into Sunday due to further rain expected here.

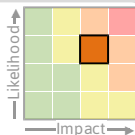

Flood Guidance Statement

15:30hrs Saturday 29 February 2020

Specific Areas of Concern Map 2: Saturday 29 February (Wales, Midlands & Devon)

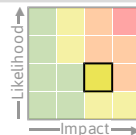

RISK AREA B
Impact **SIGNIFICANT**
Likelihood **MEDIUM**

Source River
Likely duration 1 Day

Levels remaining high along much of the River Severn.

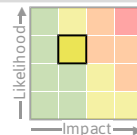

RISK AREA E
Impact **SIGNIFICANT**
Likelihood **LOW**

Source River
Likely duration 2 Days

Significant ongoing and renewed flooding possible along the Rivers Severn and Wye

RISK AREA F
Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 1 Day

Flooding impacts possible on Saturday following overnight rain.

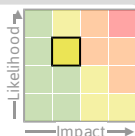

RISK AREA G
Impact **MINOR**
Likelihood **LOW**

Source River
Likely duration 1 Day

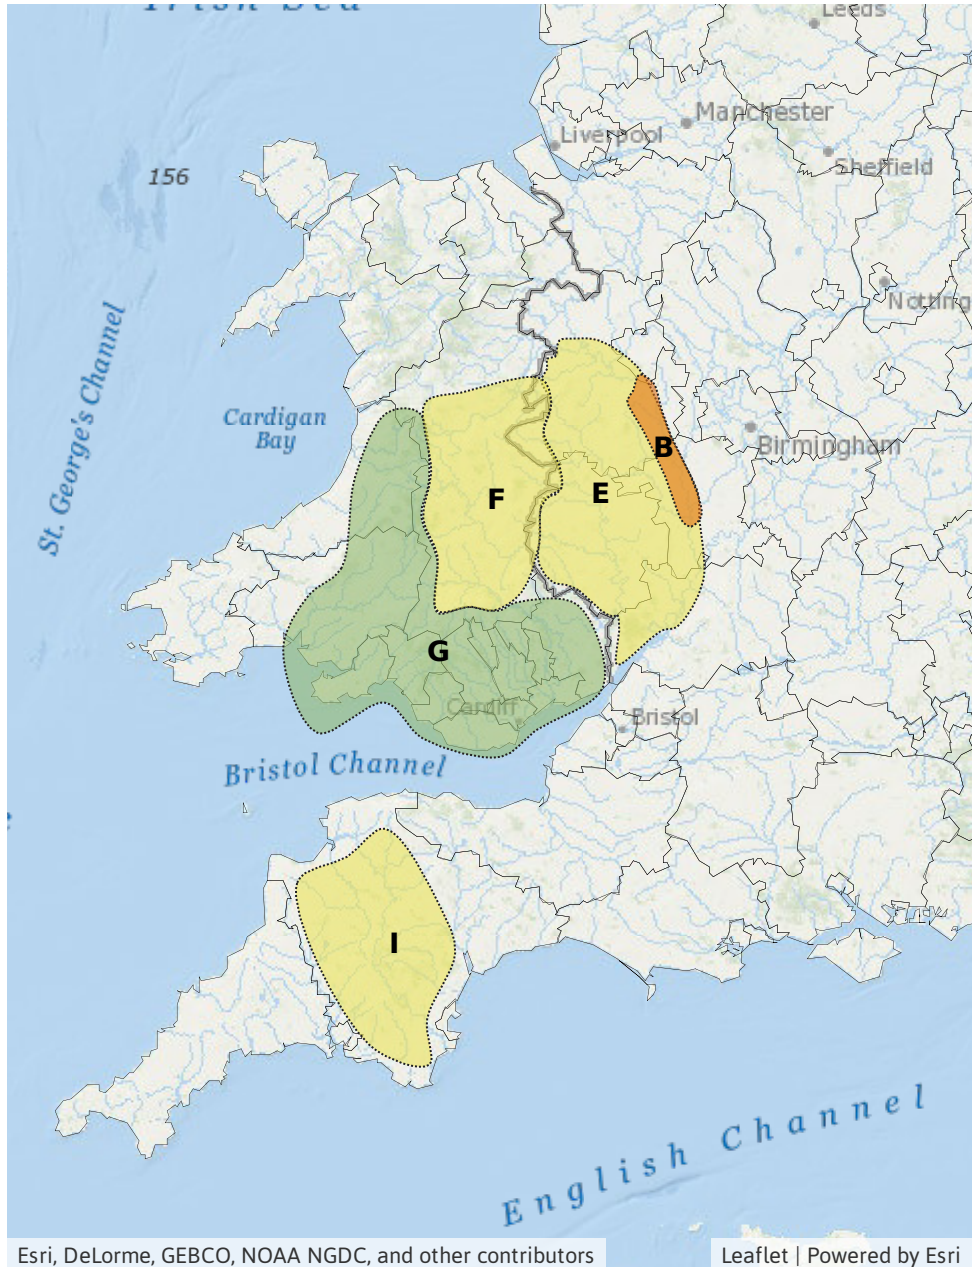

River response on Saturday from overnight rainfall.

RISK AREA I
Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 1 Day

River response today from overnight rainfall.

Flood Guidance Statement

15:30hrs Saturday 29 February 2020

Specific Areas of Concern Map 3: Sunday 1 March 2020

RISK AREA A
Impact **SIGNIFICANT**
Likelihood **HIGH**

Source River
Likely duration 5 + Days

Significant river flooding impacts for the Lower Aire washlands next five days.

RISK AREA C
Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 5 + Days

Ongoing flooding through York and in the washlands of the Rivers Aire and Ouse.

RISK AREA E
Impact **SIGNIFICANT**
Likelihood **LOW**

Source River
Likely duration 2 Days

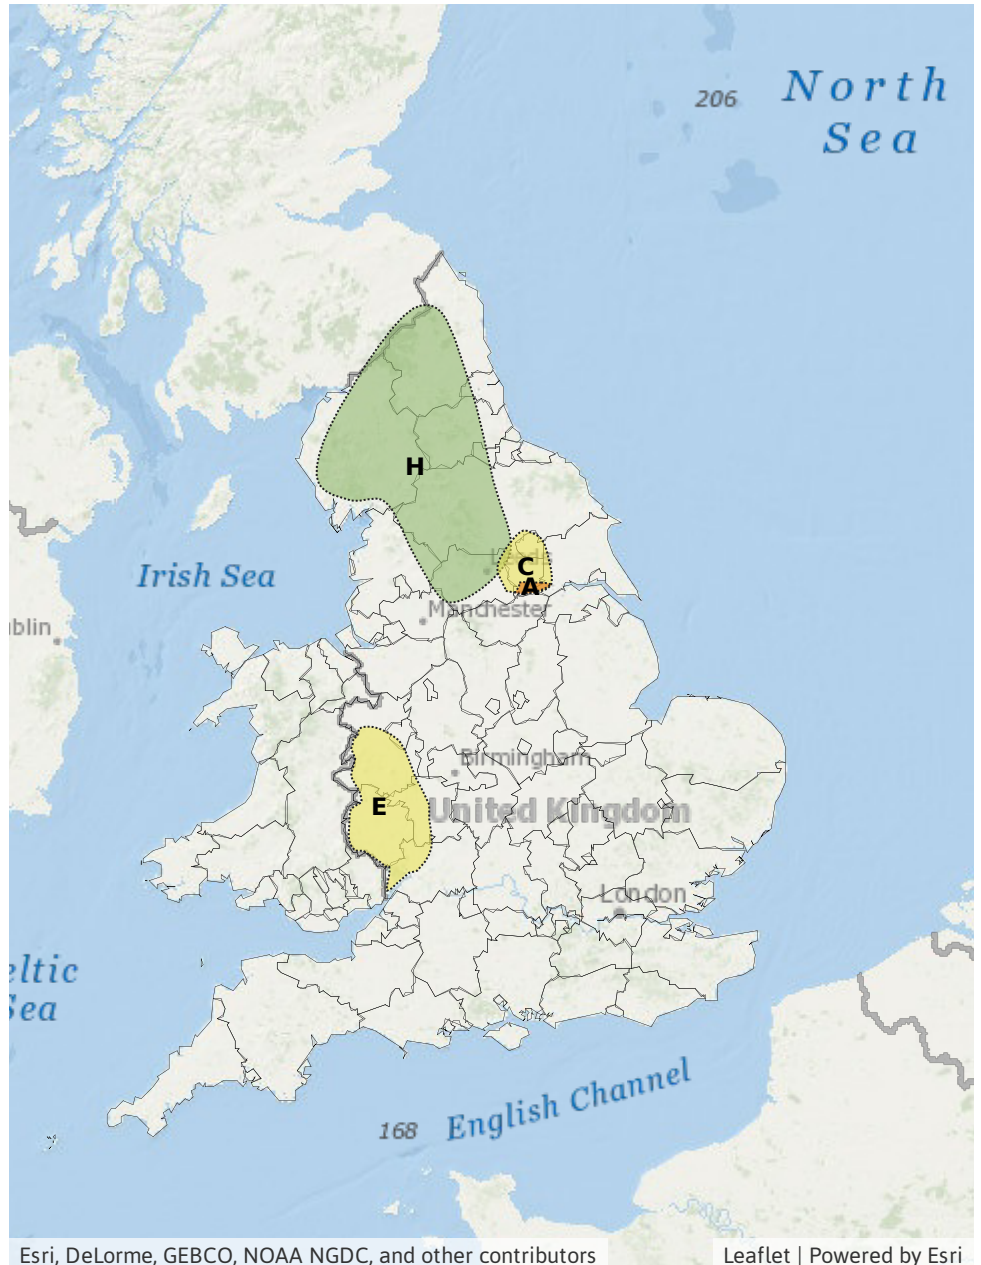

Significant ongoing and renewed flooding possible along the Rivers Severn and Wye

RISK AREA H
Impact **MINOR**
Likelihood **LOW**

Source River Surface
Likely duration 2 Days

Impacts possible later Saturday into Sunday due to further rain expected here.

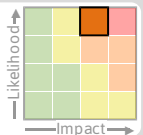

Flood Guidance Statement

15:30hrs Saturday 29 February 2020

Specific Areas of Concern Map 4: Monday 2 March to Wednesday 4 March 2020

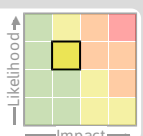

RISK AREA A
Impact **SIGNIFICANT**
Likelihood **HIGH**

Source River
Likely duration 5 + Days

Significant river flooding impacts for the Lower Aire washlands next five days.

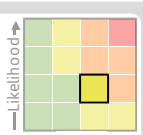

RISK AREA C
Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 5 + Days

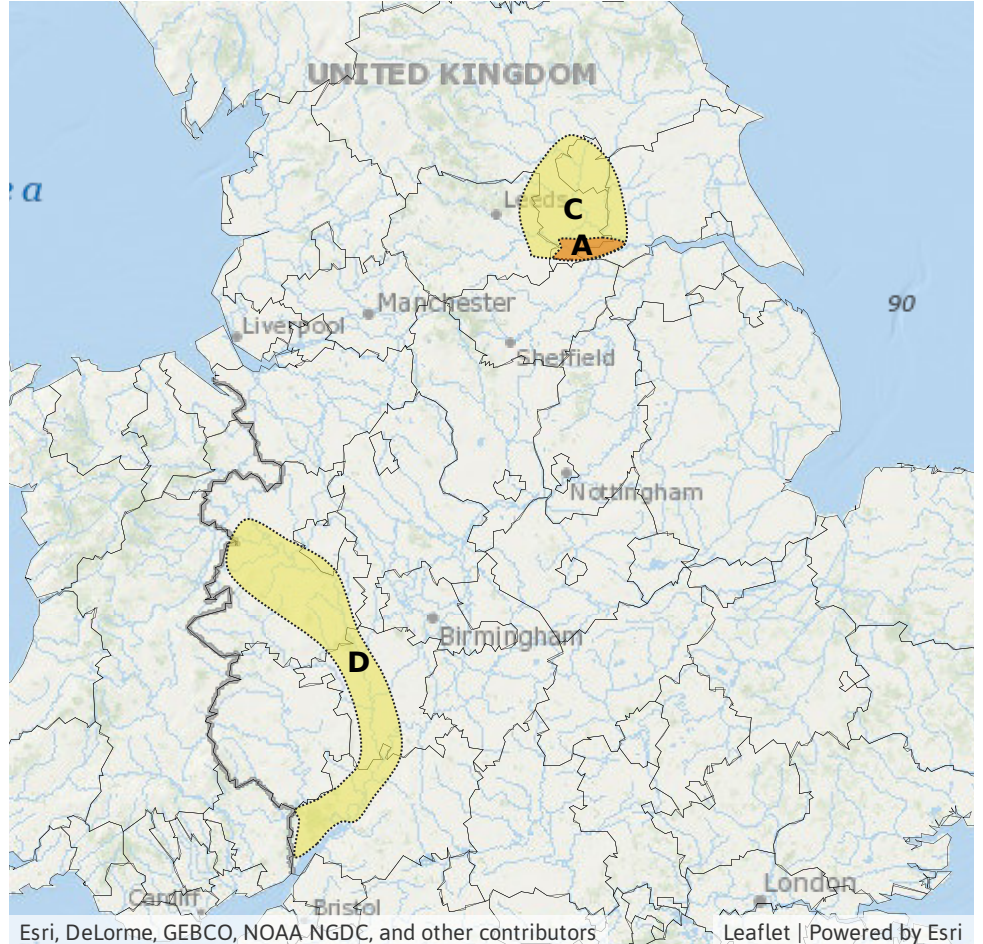

Ongoing flooding through York and in the washlands of the Rivers Aire and Ouse.

RISK AREA D
Impact **SIGNIFICANT**
Likelihood **LOW**

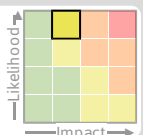

Source River
Likely duration 3 + Days

Levels remaining high along the River Severn.

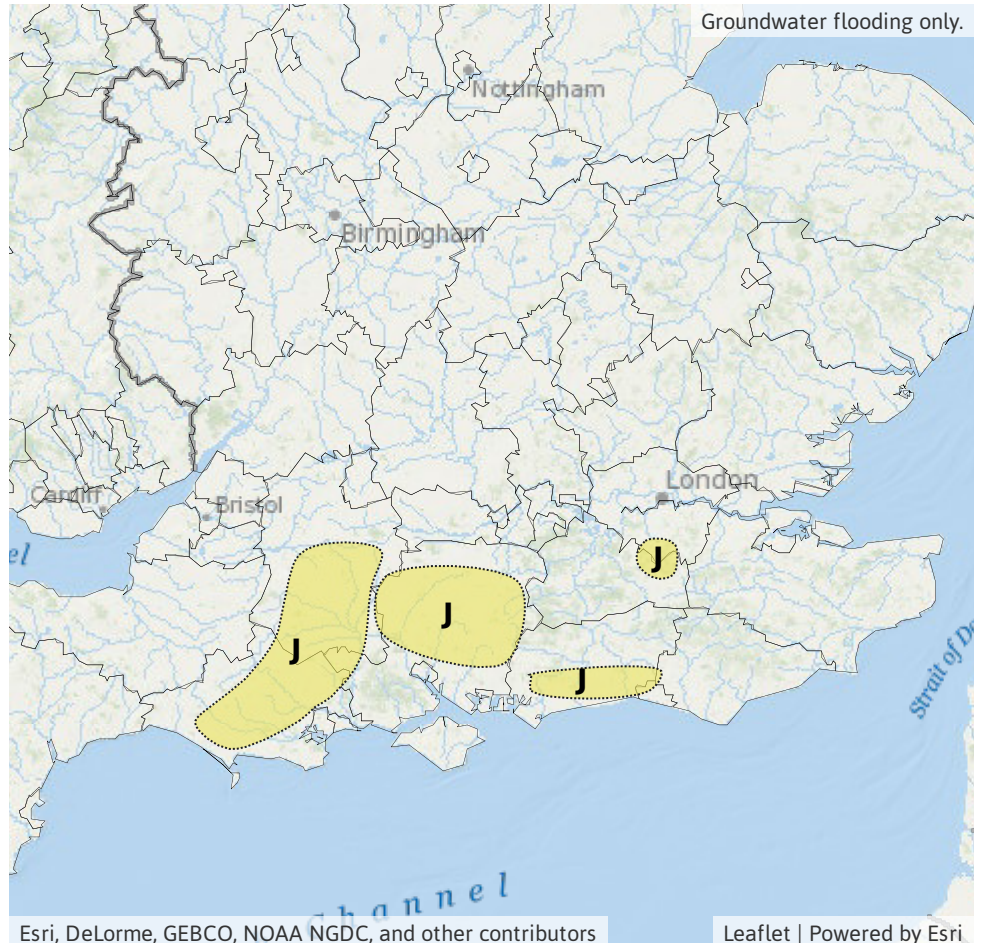

Specific Areas of Concern Map 5: Saturday 29 February to Wednesday 4 March 2020.

RISK AREA J
Impact **MINOR**
Likelihood **HIGH**

Source Ground
Likely duration 5 + Days

Localised groundwater flooding impacts for at least the next five days.

Assessment of flood risk

Rivers

The overall river flood risk is MEDIUM.

Ongoing significant river flooding impacts are expected to affect the lower River Aire washlands in Yorkshire through the five day period, with ongoing minor impacts probable more widely in the Aire and Ouse washlands.

Significant river flooding impacts are probable on parts of the River Severn today (Saturday) and are possible for at least the next five days. Significant impacts are possible along the River Teme and Wye today and tomorrow.

Ongoing minor river flooding impacts are probable for parts of central Wales today, and are possible but not expected more widely in Wales. Minor impacts possible today in Devon, and ongoing minimal impacts expected more widely across south-west England in response to rainfall overnight.

Later on Saturday and into early Sunday, minor river flooding impacts are possible across parts of northern England in response to further rain here overnight tonight.

Groundwater

The groundwater flood risk is LOW for the next five days.

Minor groundwater flooding impacts are expected to continue in parts of the south of England for at least the next five days. Groundwater levels also remain high in parts of North Lincolnshire, although impacts are currently minimal here.

Surface water

The overall surface water flood risk is VERY LOW.

Later on Saturday and early Sunday, minor surface water flooding impacts are possible across parts of northern England in response to further rain here overnight tonight.

Coastal/Tidal

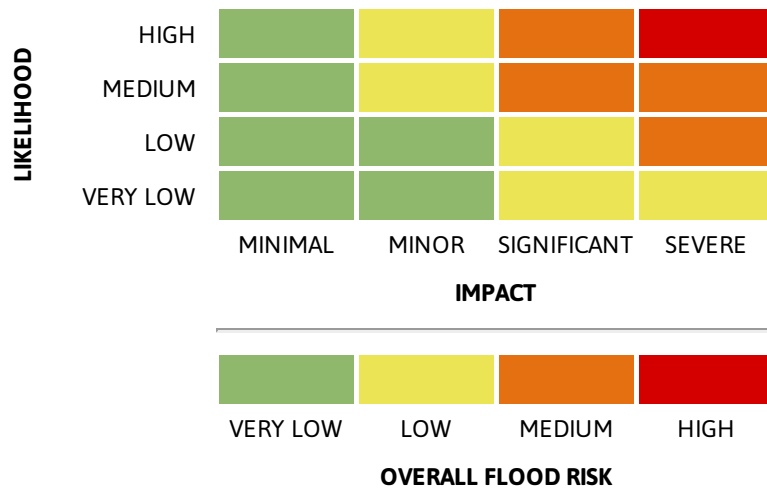

The coastal/tidal flood risk is VERY LOW for the next five days.

Local minor coastal flooding impacts are possible but not expected on Saturday evening into Sunday morning. This is due to spray and wave overtopping from large waves along some parts of the west and south coast of Wales, and the north-west, south-west and south-east coasts of England.

6-10 day forecast

Flooding impacts on the Lower River Severn and River Aire washlands and other larger rivers may continue. Weather remaining unsettled giving the risk of inland and coastal flooding impacts.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
