The overall flood risk is VERY LOW.

## Assessment of flood risk

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Minor groundwater flooding impacts are expected to continue in parts of Hampshire, Kent, Surrey and south London for at least the next five days. However, with very little rain in the forecast the level of the ongoing disruption caused by this groundwater flooding is not expected to get worse. The flooding is being managed and awareness of the groundwater flooding in these areas is high.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Strong north or north-easterly winds will lead to some large onshore waves along parts of the east coast of England on Sunday and Monday. However, only minimal impacts are expected.

### Rivers

The river flood risk is VERY LOW for the next five days.

### Surface water

The surface water flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Sunday 29 March 2020

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
