The overall flood risk is VERY LOW for the next five days.

Assessment of flood risk

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Minor groundwater flooding impacts are expected to continue in parts of Hampshire. However, flooding is being managed and groundwater levels are reducing.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Strong easterly winds may lead to some spray and wave overtopping today (Tuesday) along parts of the Yorkshire coast, but any impacts are expected to be minimal.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Rivers

The river flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
