Steady

The overall flood risk for the next five days is VERY LOW.

## Assessment of flood risk

### Surface water

The surface water flood risk is VERY LOW for the next five days.

Heavy showers may develop on Thursday, Friday and Saturday through some central and southern parts of England and Wales, however, only minimal impacts are currently expected.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days, despite strong winds and large waves along the east and south coasts of England on Sunday.

### Rivers

The river flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Wednesday 06 May 2020

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
