Minor coastal flooding impacts are possible but not expected for parts of the east coast today and tomorrow (Monday). The overall flood risk is VERY LOW.

## Assessment of flood risk

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Localised minor coastal flooding impacts are possible but not expected for parts of the east coast of England today (Sunday) and East Anglia and the south-east coast tomorrow (Monday). This is due to some surge, large waves and windblown spray.

### Surface water

The surface water flood risk is VERY LOW for the next five days, despite the chance of some locally heavy showers in the south-west of England today.

### Rivers

The river flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

**MINIMAL**

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

**MINOR**

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

**SIGNIFICANT**

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

**SEVERE**

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible

Next statement due **10:30hrs Monday 11 May 2020 (all times are local)**
