

# Flood Guidance Statement

10:30hrs Sunday 31 May 2020

Sunday

31 May 2020 10:30-23:59  
Trend since last FGS

Steady

Monday

1 Jun 2020

Steady

Tuesday

2 Jun 2020

Steady

Wednesday

3 Jun 2020

Increased

Thursday

4 Jun 2020

Increased

Minor surface water and river flooding impacts are possible but not expected on Wednesday and into Thursday. The overall flood risk is VERY LOW.

## Assessment of flood risk

### Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible but not expected in south and central parts of England and Wales on Wednesday and into the early hours of Thursday morning. This is due to the potential for heavy showers or thunderstorms.

### Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible but not expected for urban or rapidly responding water courses in south and central parts of England and Wales on Wednesday and into the early hours of Thursday morning. This is due to the potential for heavy showers or thunderstorms.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
