Minor coastal flooding impacts are possible today (Friday) and tomorrow (Saturday) in the north-east of England. The overall flood risk is VERY LOW.

### Specific Areas of Concern Map 1: Friday 5 and Saturday 6 June

**RISK AREA A**  
Impact **MINOR**  
Likelihood **LOW**

Source Coastal/Tidal  
Likely duration 2 Days

Possible minor impacts around Friday PM and Saturday AM high tides.

## Assessment of flood risk

### Coastal/Tidal

---

The coastal/tidal flood risk is VERY LOW for the next five days.

Minor coastal flooding impacts are possible down the north-east coast of England around the high tides this afternoon (Friday) and tomorrow morning (Saturday). This is due to spring tides, some surge and possibly some large waves too.

Otherwise, although tide levels will be fairly high down the east coast until Monday, no more than minimal impacts are expected.

### Surface water

---

The surface water flood risk is VERY LOW for the next five days.

### Rivers

---

The river flood risk is VERY LOW for the next five days.

### Groundwater

---

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible

Next statement due **10:30hrs Saturday 06 June 2020 (all times are local)**
