## Assessment of flood risk

### Surface water

---

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible over parts of Wales and south-west England during Wednesday afternoon and overnight into Thursday morning. This is due to persistent, at times heavy, rainfall. Urban areas are most at risk.

Minor surface water flooding impacts are possible but not expected across parts of England and Wales later on Friday and during Saturday. This is due to the potential for heavy showers and thunderstorms. Urban areas are most at risk.

### Rivers

---

The river flood risk is VERY LOW for the next five days.

### Coastal/Tidal

---

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

---

The groundwater flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Tuesday 09 June 2020

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible

Next statement due **10:30hrs Wednesday 10 June 2020 (all times are local)**
