Some significant surface water flooding impacts are possible in places across north, central and south-west England and Wales today and are also possible but not expected on Wednesday and Thursday. The overall flood risk is LOW.

## Specific Area of Concern Map 1: Tuesday 16 June 2020.

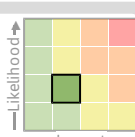

**RISK AREA A**  
Impact **SIGNIFICANT**  
Likelihood **LOW**

Source River Surface  
Likely duration 1 Day

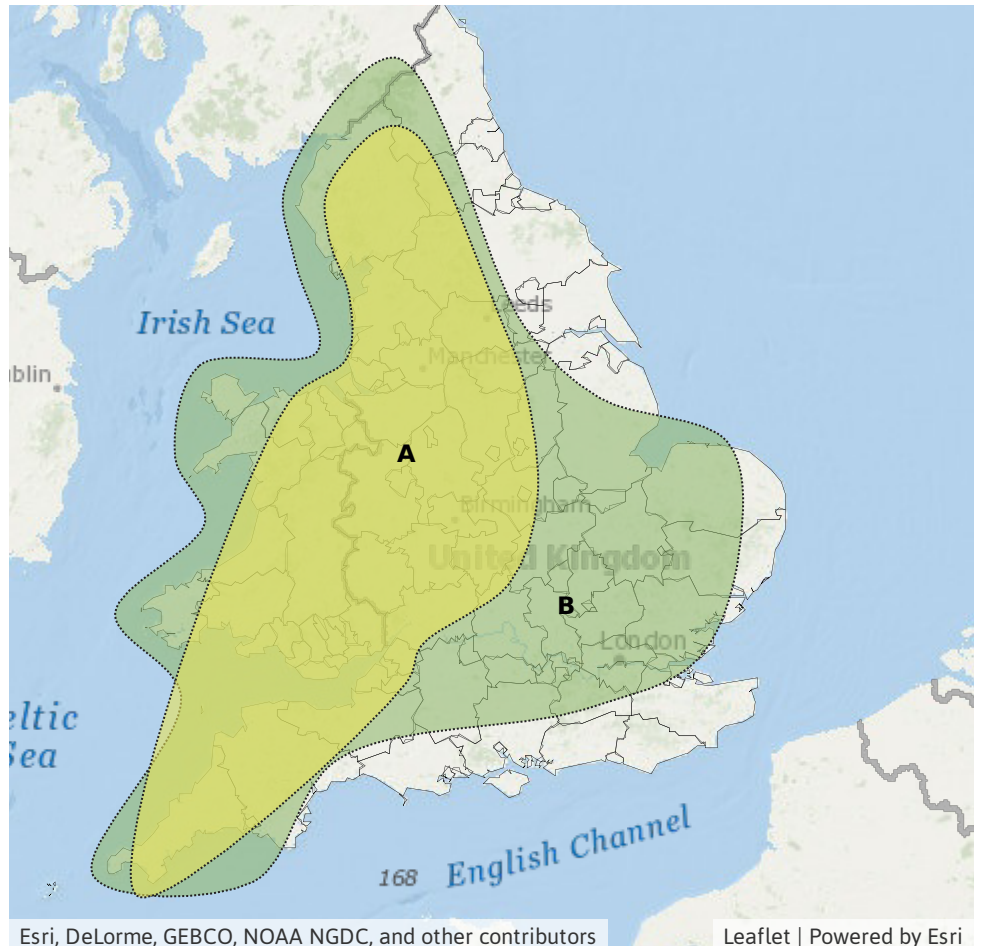

Heavy, thundery showers. Urban areas most at risk of flooding.

**RISK AREA B**  
Impact **MINOR**  
Likelihood **LOW**

Source Surface  
Likely duration 1 Day

Heavy, thundery showers. Urban areas most at risk of flooding.

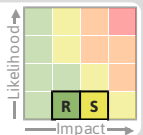

# Flood Guidance Statement

10:30hrs Tuesday 16 June 2020

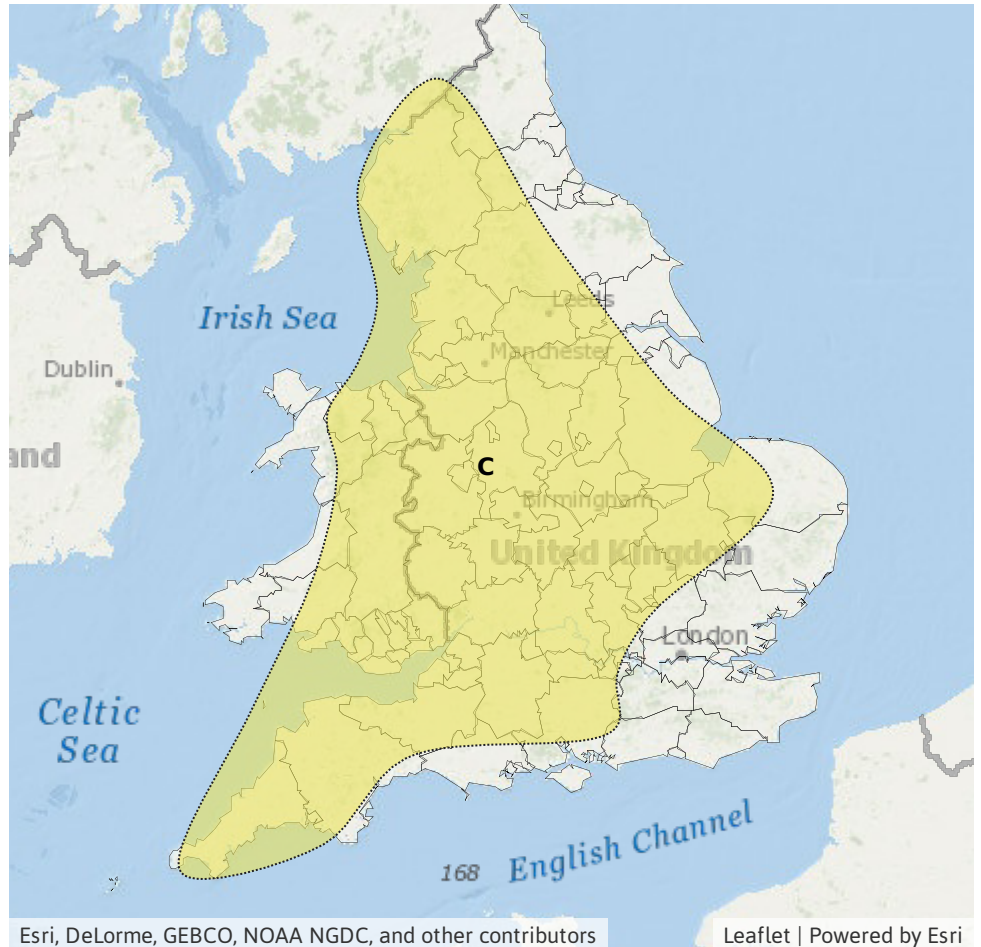

## Specific Area of Concern Map 2: Wednesday 17 June 2020.

**RISK AREA C**  
 Impact **SIGNIFICANT**  
 Likelihood **VERY LOW**

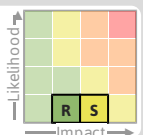

Source River Surface  
 Likely duration 1 Day

Heavy, thundery showers. Urban areas most at risk of flooding.

## Specific Areas of Concern Map 3: Thursday 18 June 2020.

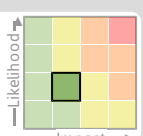

**RISK AREA D**  
 Impact **SIGNIFICANT**  
 Likelihood **VERY LOW**

Source River Surface  
 Likely duration 1 Day

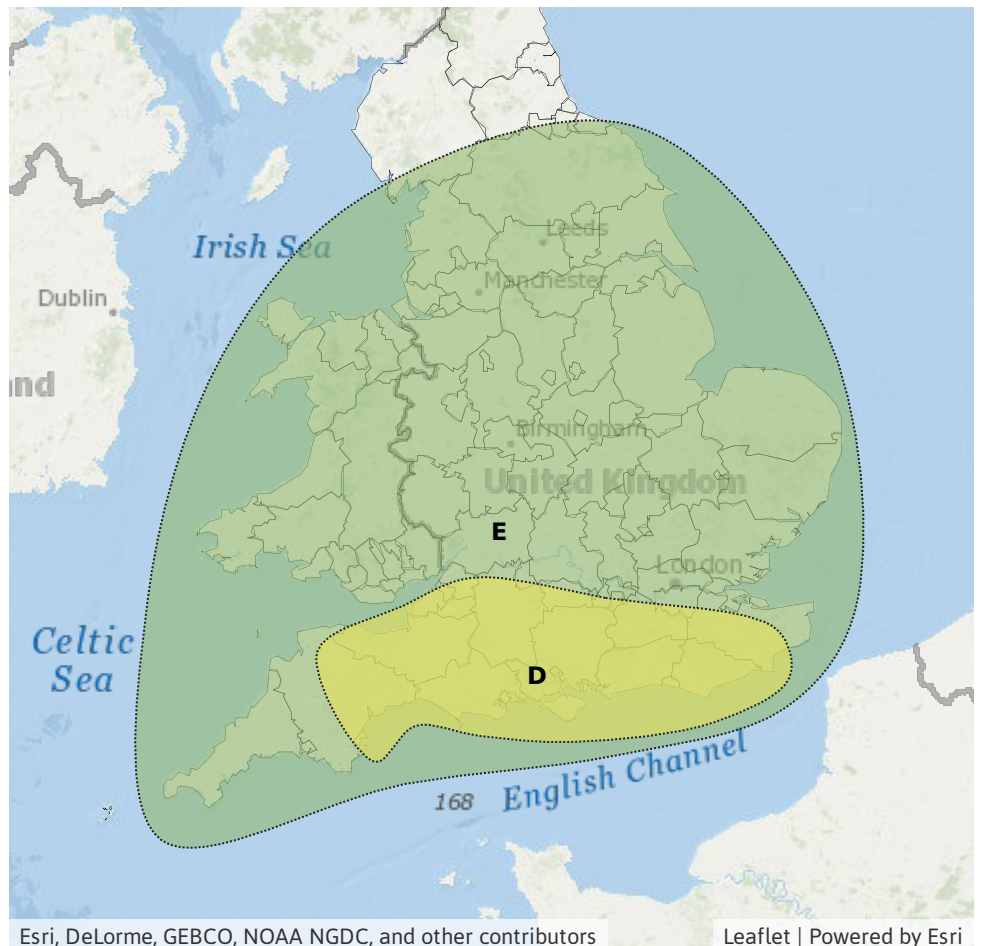

Widespread rainfall followed by heavy showers.

**RISK AREA E**  
 Impact **MINOR**  
 Likelihood **LOW**

Source Surface  
 Likely duration 1 Day

Widespread rainfall followed by heavy showers.

## Assessment of flood risk

### Surface water

---

The surface water flood risk is LOW for today, Wednesday and Thursday.

Some significant surface water flooding impacts are possible in places across parts of north, central and south-west England and Wales today. Significant surface water flooding impacts are also possible but not expected on Wednesday across much of England and Wales, and across parts of southern and central England on Thursday. Slow moving, heavy thundery showers are forecast during this period and urban areas are most at risk.

### Rivers

---

The river flood risk is VERY LOW for the next five days.

Some minor river flooding impacts are possible but not expected across parts of north, central and south-west England and Wales today. Further minor river flooding impacts are possible but not expected in places across much of England and Wales during Wednesday and across parts of southern and central England on Thursday.

Slow moving, heavy thundery showers are forecast during this period and small, fast responding and urban watercourses are most at risk.

### Coastal/Tidal

---

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

---

The groundwater flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Tuesday 16 June 2020

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible

Next statement due **10:30hrs Wednesday 17 June 2020 (all times are local)**
