Steady →

Isolated significant surface water flooding impacts are possible and river flooding impacts are possible but not expected today (Sunday) and tomorrow. Minor flooding impacts are possible on Tuesday. The overall flood risk is LOW.

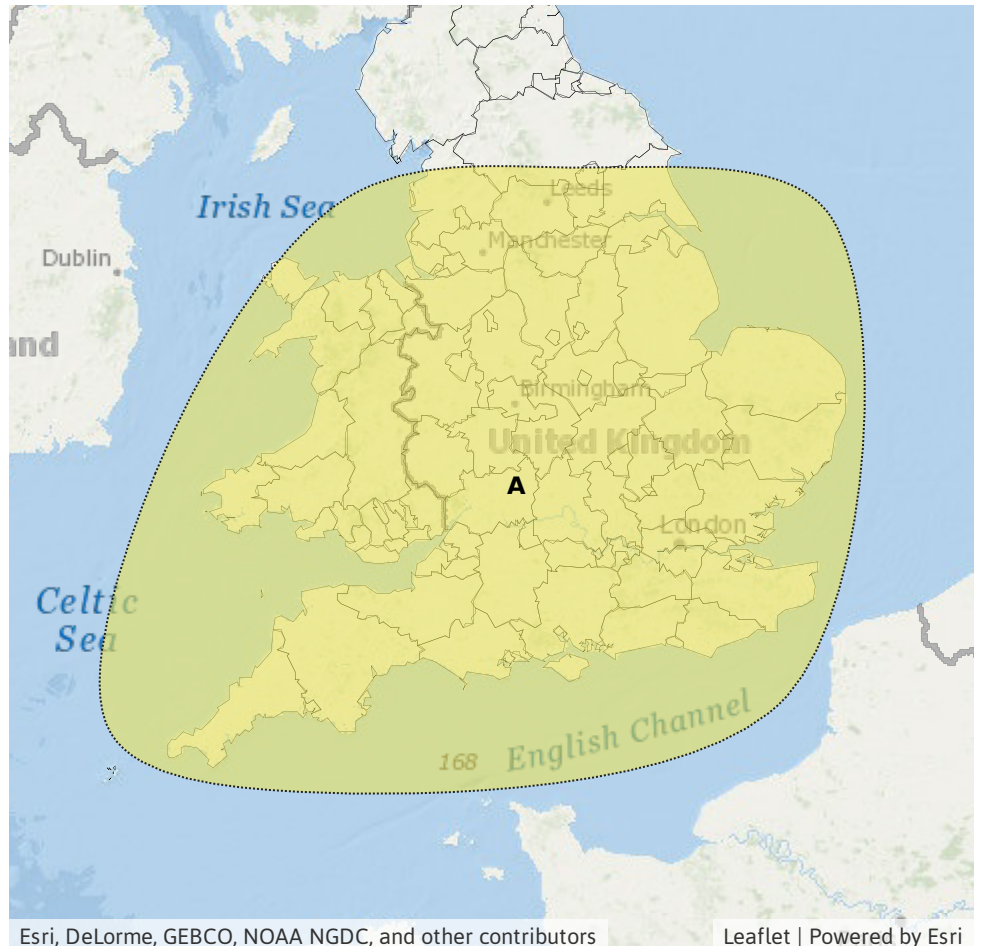

## Specific Areas of Concern Map 1: Sunday 16 August 2020

**RISK AREA A**  
Impact **SIGNIFICANT**  
Likelihood **LOW**

Source River Surface  
Likely duration 1 Day

Urban areas and fast responding rivers most prone to impacts from thunderstorms.

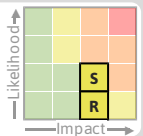

# Flood Guidance Statement

### Specific Areas of Concern Map 2: Monday 17 August 2020

**RISK AREA B**  
Impact **SIGNIFICANT**  
Likelihood **LOW**

Source River Surface  
Likely duration 1 Day

Urban areas and fast responding rivers most prone to impacts from thunderstorms.

# Flood Guidance Statement

10:30hrs Sunday 16 August 2020

### Specific Areas of Concern Map 3: Tuesday 18 August 2020

RISK AREA **C**

Impact **MINOR**

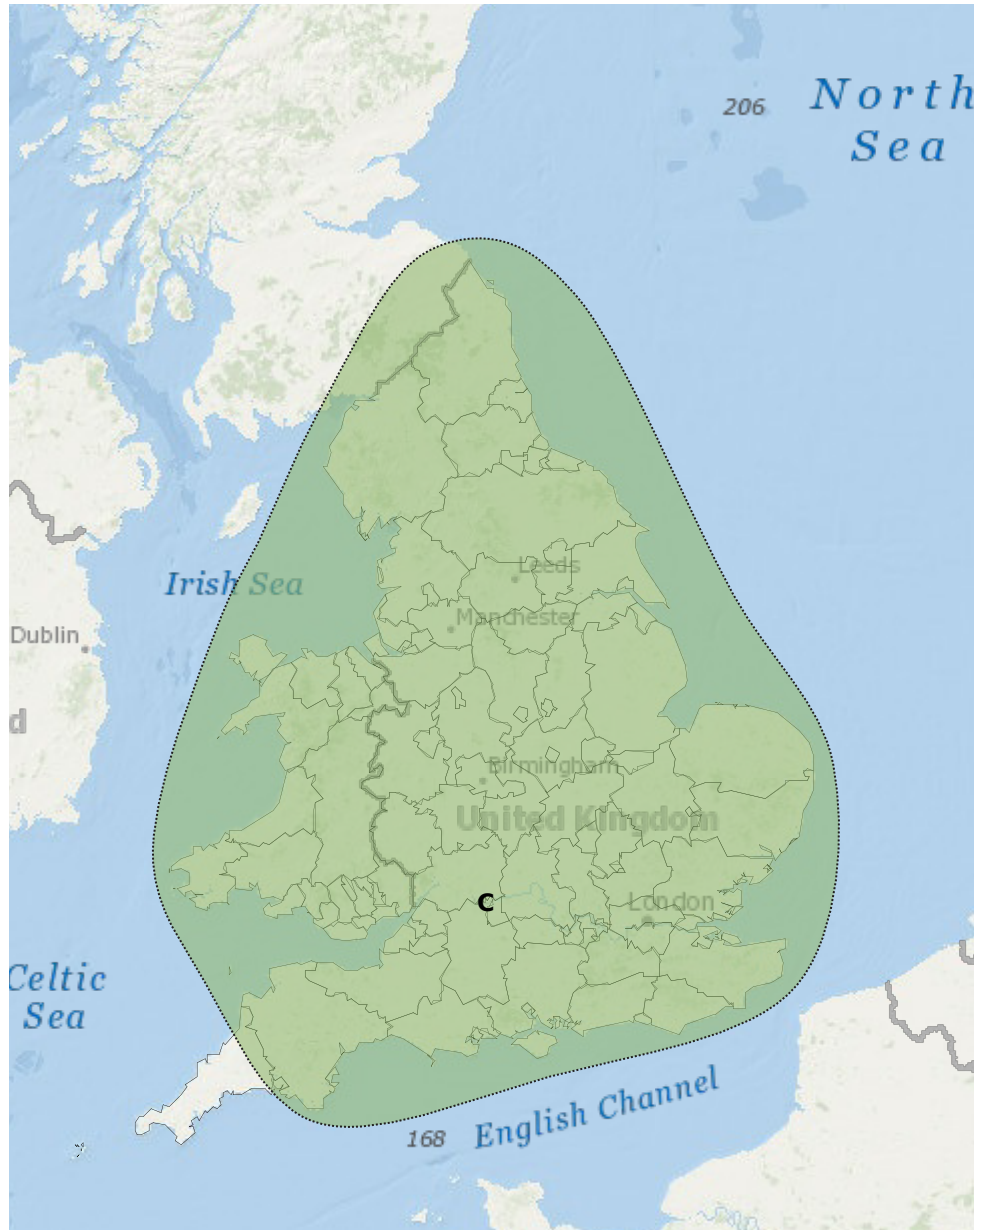

Likelihood **LOW**

Source River Surface

Likely duration 1 Day

Urban areas and fast responding rivers most prone to impacts from thunderstorms.

## Assessment of flood risk

### Surface water

---

The surface water flood risk is LOW today (Sunday) and Monday.

Isolated significant surface water flooding impacts are possible across parts of England and Wales today and tomorrow.

Minor surface water flooding impacts are possible across England and Wales on Tuesday.

This is due to heavy showers and thunderstorms. Sudden onset flooding impacts could occur by day or night. Urban areas are most prone.

### Rivers

---

The river flood risk is LOW today (Sunday) and tomorrow (Monday).

Isolated significant river flooding impacts are possible but not expected today and tomorrow. Minor river flooding impacts are possible but not expected on Tuesday. This is due to heavy showers and thunderstorms.

River impacts are likely to be restricted to small, fast-responding catchments and urban rivers. Sudden onset flooding impacts could occur by day or night.

### Coastal/Tidal

---

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

---

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible

Next statement due **10:30hrs Monday 17 August 2020 (all times are local)**
