Thursday

1 Oct 2020

Steady

The overall flood risk is VERY LOW for the next five days. See end of FGS for 6-10 day forecast.

## Assessment of flood risk

### Surface water

The surface water flood risk is VERY LOW for the next five days.

Despite the potential for periods of heavy rain on Wednesday and Thursday, any impacts are currently expected to be minimal.

### Rivers

The river water flood risk is VERY LOW for the next five days.

Despite the potential for periods of heavy rain on Wednesday and Thursday, any impacts are currently expected to be minimal.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

### 6-10 day forecast

It is expected to be very unsettled during this period with strong winds and heavy rain at times. This brings the possibility of heightened flood risk for England and Wales.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
