Steady

Wednesday

30 Sep 2020

Increased

Thursday

1 Oct 2020

Increased

Friday

2 Oct 2020

Steady

Minor surface water and river flooding impacts are possible but not expected for parts of East Anglia and the south-east of England on Wednesday and Thursday. See end of FGS for 6-10 day forecast. The overall flood risk is VERY LOW.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Some minor surface water flooding impacts are possible but not expected across parts of the far south-east of England and the coastal fringes of East Anglia later on Wednesday and into Thursday morning. This is due to the potential for some heavy rain and showers.

Rivers

The river flood risk is VERY LOW for the next five days.

Some minor river flooding impacts are possible but not expected across parts of the far south-east of England and the coastal fringes of East Anglia later on Wednesday and into Thursday morning. This is due to the potential for some heavy, persistent rain and showers.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

6-10 day forecast

It is expected to be very unsettled during this period with strong winds and heavy rain at times. This brings the possibility of heightened flood risk for England and Wales.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
