Minor surface water flooding impacts are probable on Friday over southern parts of England and possible more widely through the weekend. Ongoing tidal flooding issues in west Wales from today until Sunday. The overall flood risk is LOW.

Specific Area of Concern Map 1: Friday 02 October.

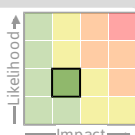

RISK AREA A
Impact **MINOR**
Likelihood **MEDIUM**

Source River Surface
Likely duration 1 Day

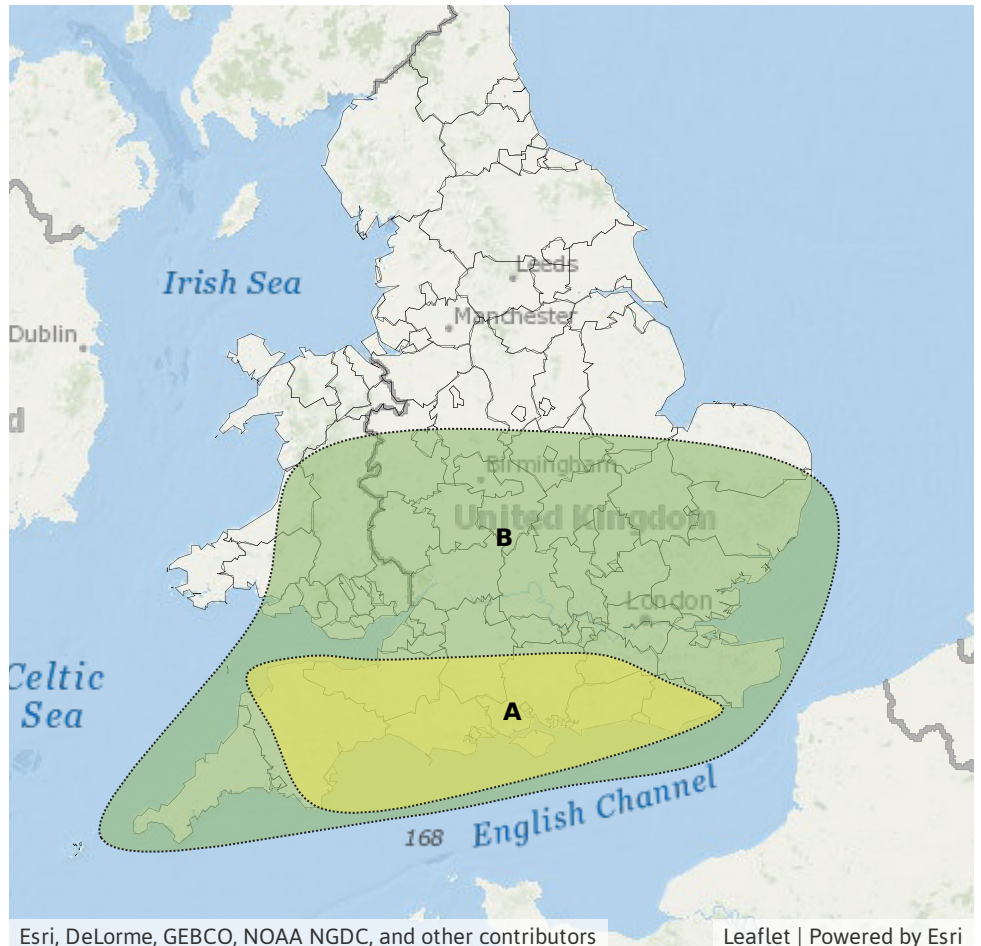

Heavy rain and leaf fall blocking drains may lead to flood impacts.

RISK AREA B
Impact **MINOR**
Likelihood **LOW**

Source River Surface
Likely duration 1 Day

Heavy rain and leaf fall blocking drains may lead to flood impacts.

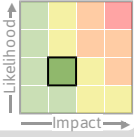

Flood Guidance Statement

10:30hrs Wednesday 30 September 2020

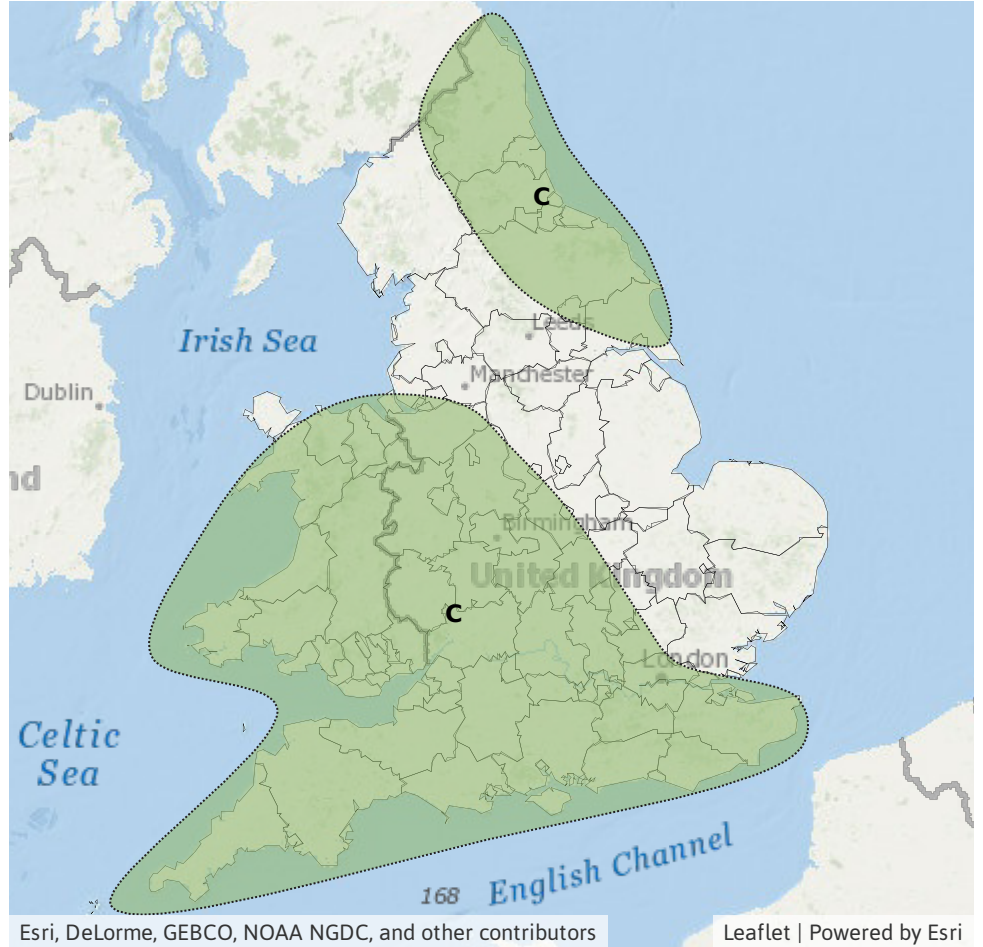

Specific Area of Concern Map 2: Saturday 03 and Sunday 04 October.

RISK AREA C
Impact **MINOR**
Likelihood **LOW**

Source River Surface
Likely duration 2 Days

Widespread and persistent heavy rain.

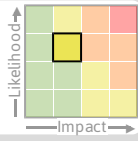

Flood Guidance Statement

10:30hrs Wednesday 30 September 2020

Specific Area of Concern Map 3: Wednesday 30 September to Sunday 04 October.

RISK AREA **D**
Impact **MINOR**
Likelihood **MEDIUM**

Source Coastal/Tidal
Likely duration 5 Days

Afon Leri watercourse is at risk of flooding nearby land at times of high tide.

Assessment of flood risk

Surface water

The surface water flood risk is LOW on Friday.

Minor surface water flooding impacts are probable across parts of southern England on Friday and possible more widely across England and Wales over the weekend. This is due to the potential for widespread and persistent heavy rain and showers. Wind blown debris may exacerbate the flood risk locally.

Coastal/Tidal

The coastal/tidal flood risk is LOW for the next five days.

Minor tidal flooding impacts are probable near Ynyslas in Ceredigion today through to Sunday. This is due to a breach in the Afon Leri watercourse embankment which will allow nearby land to flood when water levels increase during times of high tide.

Elsewhere, despite coastal gales and large waves at times, any coastal flooding impacts are expected to be minimal.

Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible across parts of southern and central England on Friday and more widely over parts of England and Wales over the weekend. This is due to the potential for widespread, persistent heavy rain and showers.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Wednesday 30 September 2020

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Thursday 01 October 2020 (all times are local)**
