Saturday

17 Oct 2020

Increased ↑

Minor coastal flooding impacts are possible but not expected for some coasts on Saturday. The overall flood risk is VERY LOW.

## Assessment of flood risk

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Minor coastal flooding impacts are possible but not expected on Saturday for parts of the Bristol Channel, the south coast of Devon and Cornwall and the North East coast of England. This is due to high spring tides. Impacts possible around times of high water.

### Surface water

The surface water flood risk is VERY LOW for the next five days.

Rain in the south-east of England today is no longer expected to cause any flooding impacts.

### Rivers

The river flood risk is VERY LOW for the next five days.

Rain in the south-east of England today is no longer expected to cause any flooding impacts.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
