Significant surface water and river flooding impacts are possible on Sunday into Monday across parts of Wales and England with river impacts continuing until Wednesday in places. The overall flood risk is LOW.

Specific Areas of Concern Map 1: Sunday 1 and Monday 2 November 2020

RISK AREA A

Impact **SIGNIFICANT**
Likelihood **LOW**

Source River Surface
Likely duration 2 Days

Heavy rain Sunday into early Monday morning.

RISK AREA B

Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River
Likely duration 3 Days

Ongoing river flooding in Yorkshire until Monday.

RISK AREA C

Impact **MINOR**
Likelihood **MEDIUM**

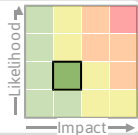

Source River
Likely duration 3 Days

Ongoing river response from Monday until Wednesday.

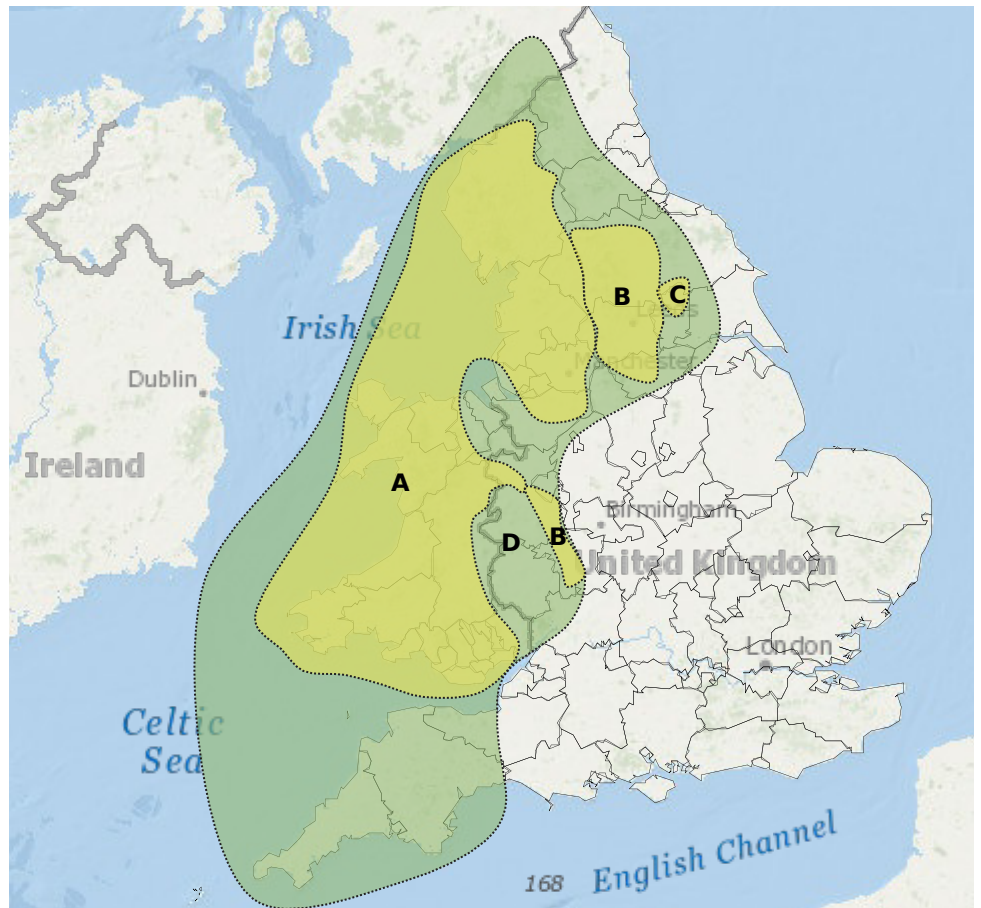

RISK AREA D

Impact **MINOR**
Likelihood **LOW**

Source River Surface
Likely duration 2 Days

Further heavy rain falling on sensitive catchments.

Flood Guidance Statement

10:30hrs Sunday 01 November 2020

Specific Areas of Concern Map 2: Tuesday 3 and Wednesday 4 November 2020

RISK AREA B

Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River

Likely duration 3 Days

Ongoing river response until Tuesday.

RISK AREA C

Impact **MINOR**
Likelihood **MEDIUM**

Source River

Likely duration 3 Days

Ongoing river response from Monday until Wednesday.

RISK AREA E

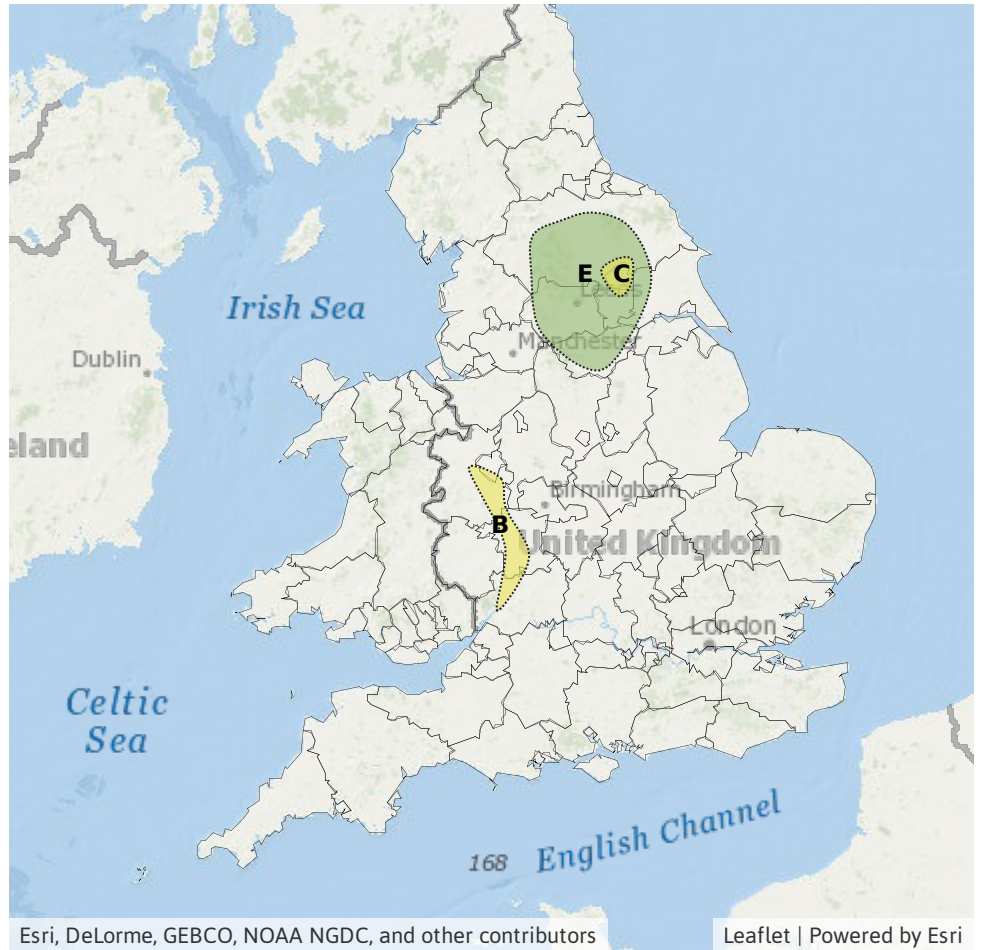

Impact **MINOR**
Likelihood **LOW**

Source River

Likely duration 3 Days

Possible ongoing river flooding.

Assessment of flood risk

Rivers

The river flood risk is LOW from today.

Significant river flooding impacts are possible in Wales and parts of England from today (Sunday) and continuing until Wednesday in slower responding rivers. This is due to the ongoing successive bouts of heavy and persistent rainfall continuing through today and into tomorrow. Minor impacts are possible more widely until Wednesday.

Surface water

The surface water flood risk is LOW from today until Monday.

Significant surface water flooding impacts are possible today (Sunday) and Monday, in Wales and parts of England. This is due to successive bouts of heavy and persistent rainfall. Minor impacts are also possible more widely today and on Monday.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Minor coastal flooding impacts are possible but not expected through today (Sunday) and into Monday for parts of the south and west coasts of England and Wales. Minor coastal impacts are also possible but not expected for the north-east coast of England on Monday. This is due to coastal gales during the spring tide period bringing a risk of localised spray and wave over-topping to exposed parts of the coast.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Monday 02 November 2020 (all times are local)**
