Monday

23 Nov 2020

Steady →

Significant coastal/tidal impacts are possible but not expected along parts of the east coast of England today (Thursday). The overall flood risk is LOW.

Specific Areas of Concern Map 1: Thursday 19 November

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is LOW for Thursday.

Significant coastal/tidal impacts are possible but not expected along parts of the east coast of England today (Thursday). Minor impacts are also possible elsewhere along the east coast today. This is due to a coastal surge coinciding with high astronomical tides and large waves in places.

Rivers

The river flood risk is VERY LOW for the next five days.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
