Increased ↑

Minor river flooding impacts are probable for parts of the River Severn until Wednesday and some other large rivers today (Sunday) and tomorrow (Monday). The overall flood risk is LOW. See end of FGS for 6-10 day forecast.

Specific Areas of Concern Map 1: Sunday 24 to Thursday 28 January

RISK AREA A

Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 4 Days

Ongoing impacts for River Severn until Wednesday.

RISK AREA B

Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 2 Days

Ongoing flooding impacts on the Trent and larger rivers in Yorkshire until Mon.

RISK AREA C

Impact **MINOR**
Likelihood **MEDIUM**

Source River
Likely duration 1 Day

Ongoing impacts along the River Dee on Sun.

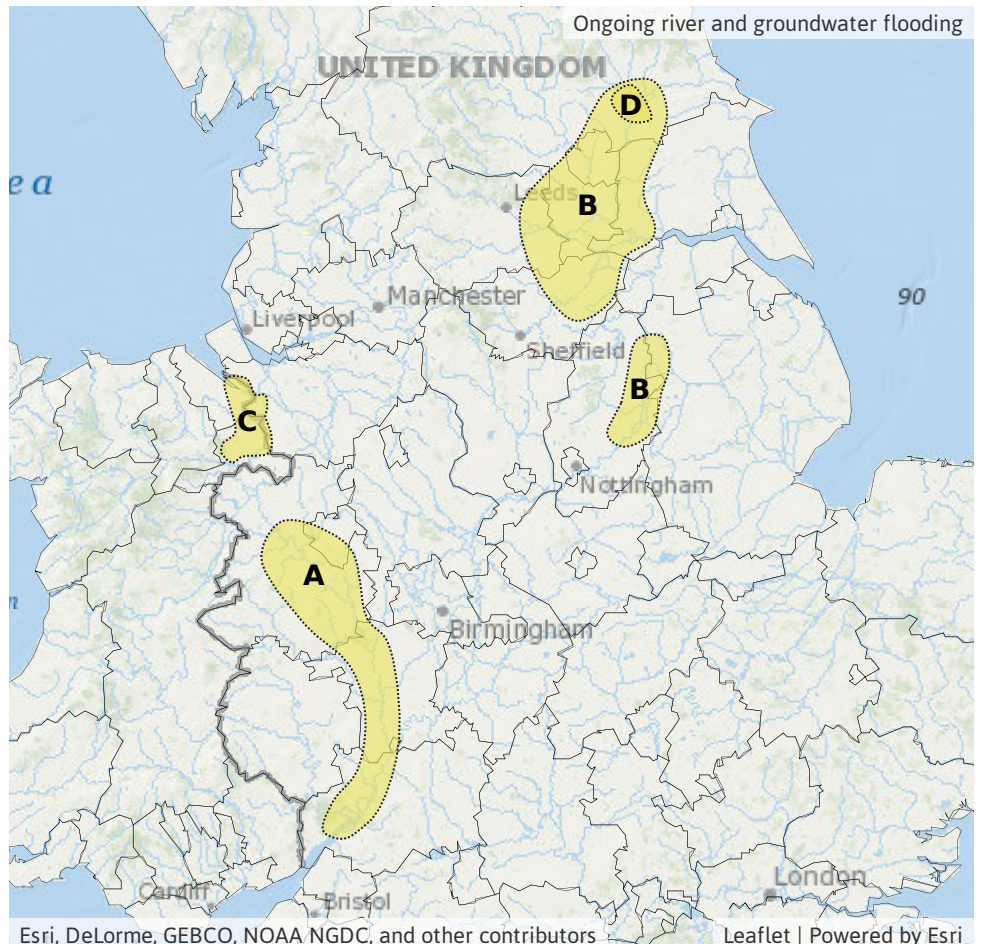

RISK AREA D

Impact **MINOR**
Likelihood **MEDIUM**

Source Ground
Likely duration 5 + Days

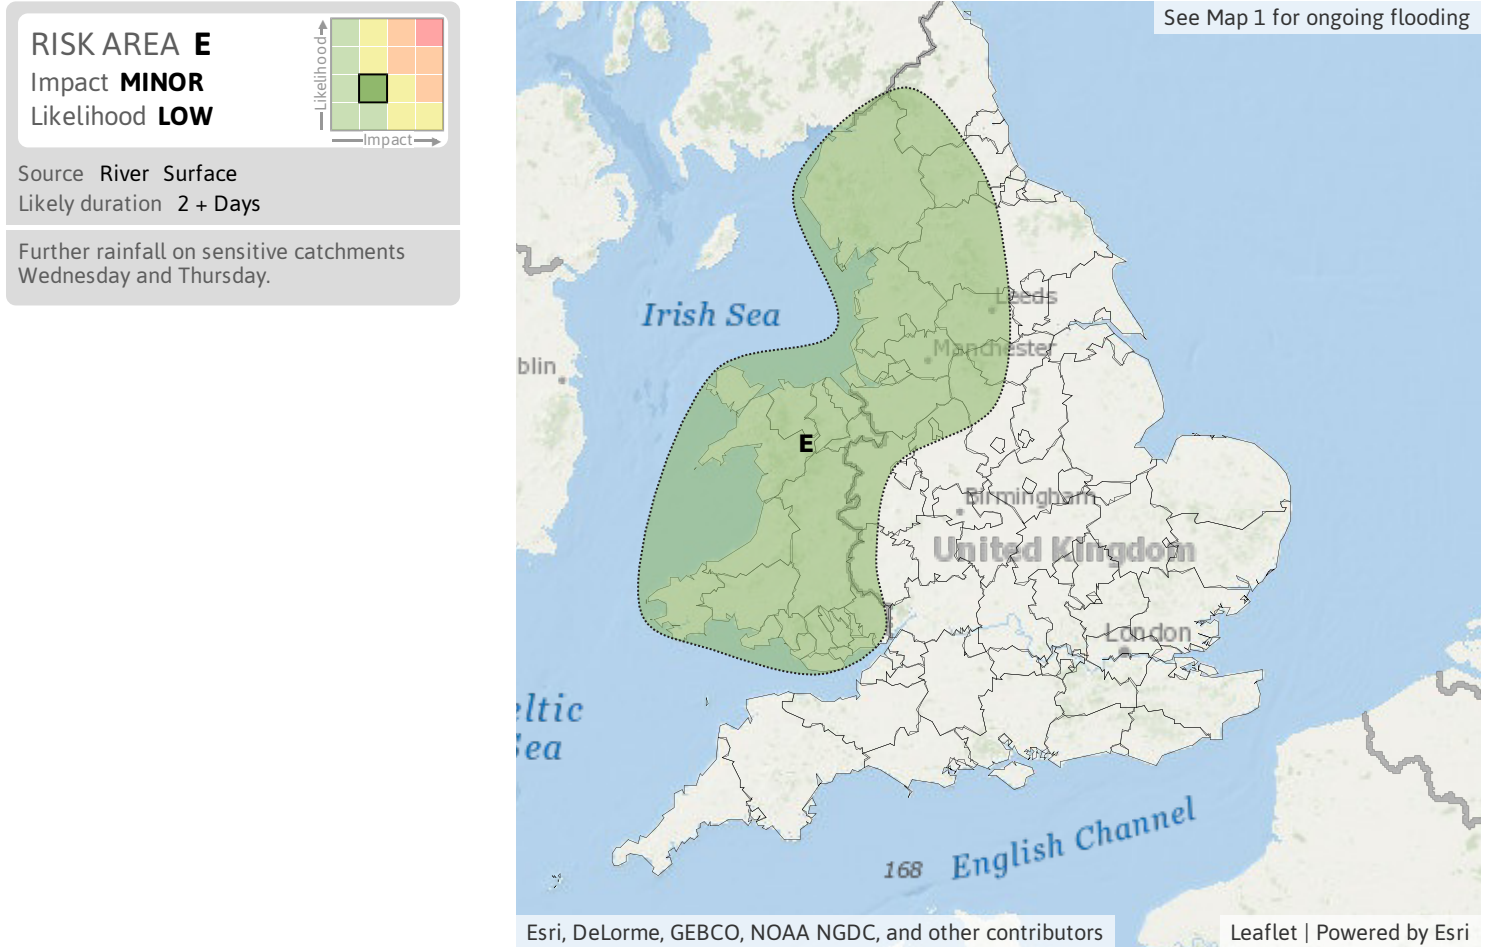

Groundwater flooding probable in the Malton, Norton and Old Malton area.

Flood Guidance Statement

10:30hrs Sunday 24 January 2021

Specific Areas of Concern Map 2: Wednesday 27 to Thursday 28 January

Assessment of flood risk

Rivers

The river flood risk is LOW until Wednesday.

Minor river flooding impacts are probable along parts of the River Severn until Wednesday and some other large river catchments today (Sunday) and tomorrow (Monday).

Minor river flooding impacts are possible across Wales and parts of the north of England, and possible but not expected across central and the east of England on Wednesday and Thursday due to further rain on sensitive catchments.

Groundwater

The groundwater flood risk is LOW for at least the next five days.

Minor groundwater flooding is probable in North Yorkshire in the Malton, Norton and Old Malton area throughout the next five days. Groundwater levels are also high elsewhere, particularly in parts of the south and east of England.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible across Wales and parts of the north of England on Wednesday and Thursday due to potential for heavy rain on saturated ground.

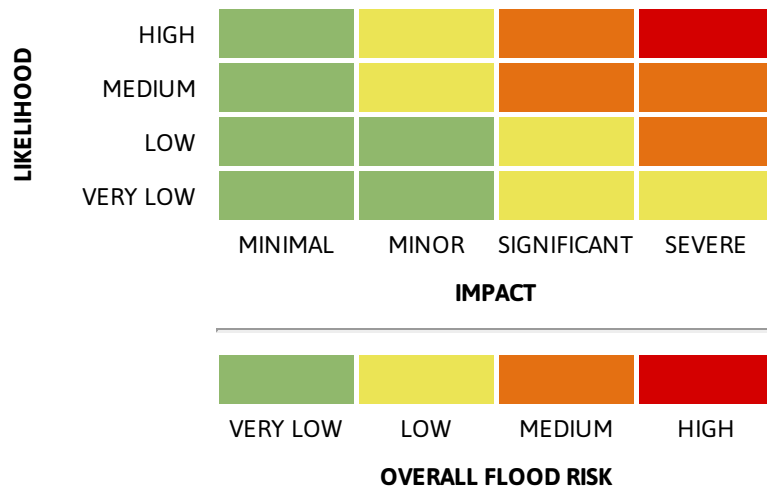

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

6-10 day forecast

There is potential for further river and surface water flooding in parts of England and Wales. River catchments and ground conditions remain sensitive to further prolonged periods of heavy rain which are considered likely during this period.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
