The overall flood risk for England and Wales for the next five days is VERY LOW.

## Assessment of flood risk

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Large waves will affect parts of the Yorkshire coast and the west and south coasts of England and Wales today (Saturday), with isolated instances of wind blown spray and over-topping but only minimal impacts are expected, those continuing along parts of the Yorkshire coast until Monday.

### Rivers

The river flood risk is VERY LOW for the next five days.

Elevated river levels in the City of York today (Saturday) and tomorrow, following recent heavy rain in the Pennines, could lead to some local minimal impacts.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Groundwater levels are high in many parts of the country, particularly in Hampshire, Sussex, Kent and other parts of the south and east of England.

### Surface water

The surface water flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Saturday 13 March 2021

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
