The overall flood risk for England and Wales for the next five days is VERY LOW.

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days, despite gales, large waves and surge for some North Sea coasts today (Tuesday) and Wednesday. Some isolated instances of wave overtopping and windblown spray are possible at times, particularly along the Yorkshire coast.

Groundwater

The groundwater flood risk is VERY LOW for the next five days, though levels are high in Kent and parts of the south and east of England.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Rivers

The river flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
