The overall flood risk for England and Wales for the next five days is VERY LOW.

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days. Large astronomical tides on Tuesday and Wednesday and with isolated instances of wave over topping along the Yorkshire coast, localised flood impacts are possible but not expected.

Groundwater

The groundwater flood risk is VERY LOW for the next five days, although levels are high in Kent and parts of the south and east of England.

Rivers

The river flood risk is VERY LOW for the next five days.

Surface water

The surface water flood risk is VERY LOW for the next five days.
