The overall flood risk for England and Wales is VERY LOW for the next five days.

## Assessment of flood risk

### Surface water

The surface water flood risk is VERY LOW for the next five days.

Despite a spell of heavy rain today (Sunday) and showers/thunderstorms tomorrow (Monday), no more than minimal surface water flooding impacts are expected.

### Rivers

The river flood risk is VERY LOW for the next five days.

Despite a spell of heavy rain today (Sunday) and showers/thunderstorms tomorrow (Monday), no more than minimal river flooding impacts are expected.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

**MINIMAL**

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

**MINOR**

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

**SIGNIFICANT**

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

**SEVERE**

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
