24 May 2021 10:30-23:59

Trend since last FGS

Increased

Tuesday

25 May 2021

Steady

Wednesday

26 May 2021

Steady

Thursday

27 May 2021

Steady

Friday

28 May 2021

Steady

Localised minor surface water flooding impacts are possible but not expected for Wales and parts of England today (Monday). The overall flood risk is VERY LOW for the next five days.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Localised minor surface water flooding impacts are possible but not expected today (Monday) in Wales and central and eastern England. Parts of north-west and south-west England may also be affected. This is due to heavy showers and thunderstorms.

Rivers

The river flood risk is VERY LOW for the next five days.

Despite heavy showers and thunderstorms today (Monday), no more than minimal river flooding impacts are expected.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
