

Flood Guidance Statement

10:30hrs Tuesday 25 May 2021

FLOODFORECASTINGCENTRE

a working partnership between Environment Agency | Met Office

Tuesday

25 May 2021 10:30-23:59

Trend since last FGS

Increased

Wednesday

26 May 2021

Increased

Thursday

27 May 2021

Steady

Friday

28 May 2021

Steady

Saturday

29 May 2021

Steady

The overall flood risk is VERY LOW for the next five days. Localised minor inland flooding impacts are possible but not expected for parts of the north of England today (Tuesday) and tomorrow.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Localised minor surface water flooding impacts are possible but not expected in parts of the north-east of England today (Tuesday) and in parts of the north of England tomorrow. This is due to scattered, heavy showers.

Rivers

The river flood risk is VERY LOW for the next five days.

Localised minor river flooding impacts are possible but not expected in urban and fast-responding catchments in parts of the north-east of England today (Tuesday) due to scattered, heavy showers.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
