1 Jun 2021 10:30-23:59
Trend since last FGS

Steady

Wednesday

2 Jun 2021

Steady

Thursday

3 Jun 2021

Increased

Friday

4 Jun 2021

Increased

Saturday

5 Jun 2021

Steady

Minor surface water flooding impacts are possible but not expected in parts of central and southern England and Wales on Wednesday and parts of the south east of England on Thursday and Friday. The overall flood risk is VERY LOW.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible but not expected on Wednesday afternoon in parts of central and southern England and Wales due to heavy showers.

Minor surface water flooding impacts are possible but not expected from late Thursday and during Friday for the coastal counties of Sussex, Kent, Essex, Suffolk and Norfolk. This is due to the potential for heavy thunderstorms.

Rivers

The river flood risk is VERY LOW for the next five days, despite the potential for thundery showers to affect parts of the southeast of England and East Anglia on Thursday and Friday.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
