8 Jun 2021

Steady

Wednesday

9 Jun 2021

Steady

Minor surface water flooding impacts are possible but not expected across southern parts of England and Wales on Sunday and more widely across England and eastern parts of Wales on Monday. The overall flood risk is VERY LOW.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible but not expected in the south of Wales and some central and south-west parts of England on Sunday afternoon and evening. Further minor impacts are also possible but not expected across central and east of England and parts of the north and east of Wales on Monday. This is due to the potential for heavy showers on both days.

Rivers

The river flood risk is VERY LOW for the next five days.

Due to heavy showers minor river flooding impacts are possible but not expected across parts of south east of England on Monday. Despite the potential for heavy showers on Sunday and Monday only minimal river flooding impacts are expected across all other areas.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
