Steady

Wednesday

16 Jun 2021

Increased

Minor surface water and river flooding impacts are possible but not expected in parts of southern, central and eastern England on Wednesday. The overall flood risk is VERY LOW. See end of FGS for 6-10 day forecast.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Localised minor surface water flooding impacts are possible but not expected in parts of southern, central and eastern England on Wednesday. This is due to scattered and possibly heavy, thundery downpours which may develop during the afternoon and through the evening.

Rivers

The river flood risk is VERY LOW for the next five days.

Some very localised minor river flooding impacts are possible but not expected in parts of southern, central and eastern England on Wednesday. This is due to scattered and possibly heavy, thundery downpours which may develop during the afternoon and through the evening, resulting in elevated water levels in some fast responding and urban watercourses.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

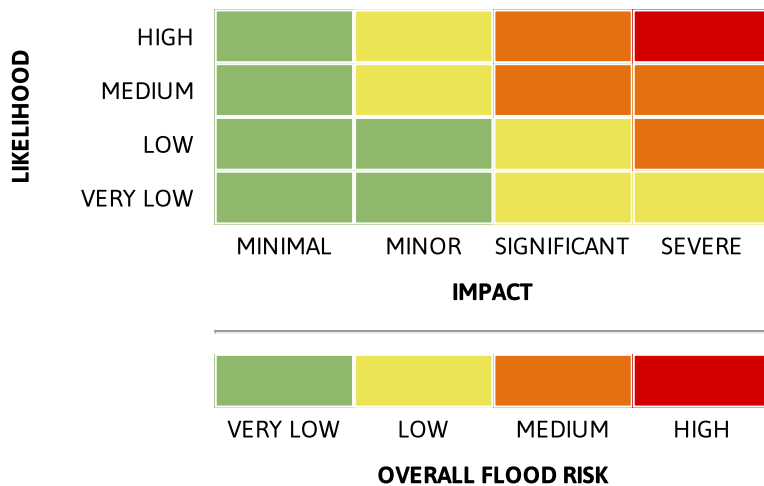

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

6-10 day forecast

Heavy, thundery downpours may result in some surface water and river (urban and fast responding rivers) flooding impacts next Thursday, although forecast details are currently very uncertain.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
