23 Jun 2021

Steady

Thursday

24 Jun 2021

Steady

Friday

25 Jun 2021

Increased

Saturday

26 Jun 2021

Increased

Minor surface water flooding impacts are possible but not expected in parts of central, southern and eastern England on Friday and Saturday, and parts of Wales on Friday. The overall flood risk is VERY LOW.

## Assessment of flood risk

### Surface water

The surface water flood risk is VERY LOW for the next five days.

Local minor surface water flooding impacts are possible but not expected across much of Wales and central and southern parts of England on Friday, and across the south and south-east of England on Saturday. This is due to slow moving heavy showers.

### Rivers

The river flood risk is VERY LOW for the next five days.

Local minor river flooding impacts are possible but not expected across parts of Wales and central and southern England on Friday, and across the south and south-east of England on Saturday. This is due to slow moving heavy showers. Only small fast responding urban catchments are likely to be affected.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
