Increased

Minor inland flood impacts are possible but not expected for parts of central and southern England on Sunday. The overall flood risk is VERY LOW for the next five days.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Localised minor surface water flooding is possible but not expected in parts of central and southern England on Sunday, in response to locally heavy and perhaps thundery showers. Not all areas will be affected and urban areas are most prone.

Rivers

The river flood risk is VERY LOW for the next five days.

Localised minor river flooding of small, urban and fast responding water courses is possible but not expected in parts of central and southern England on Sunday, in response to locally heavy and perhaps thundery showers. Not all areas will be affected and urban areas are most prone.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Large tides may result in operational activity along some coastlines on Thursday and Friday, but any flooding impacts are expected to be minimal.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
