Thursday

30 Sep 2021

Steady

Minor inland flood impacts are possible but not expected for parts of England and Wales today, tonight and on Tuesday and Wednesday. The overall flood risk is VERY LOW for the next five days.

## Assessment of flood risk

### Surface water

The surface water flood risk is VERY LOW for the next five days.

Localised minor surface water flooding is possible but not expected in parts of east and south-east England today (Sunday), in Wales and south-west England tonight and in parts of Wales and north-west England on Tuesday and Wednesday.

### Rivers

The river flood risk is VERY LOW for the next five days.

Localised minor flooding of small urban and fast responding catchments is possible but not expected in parts of east and south-east England today (Sunday), in Wales and south-west England tonight and in parts of Wales and north-west England on Tuesday and Wednesday.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
