Steady

Minor inland flood impacts are possible but not expected for parts of England and Wales from today (Tuesday) to Friday. The overall flood risk is VERY LOW for the next five days.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Localised minor surface water flooding is possible but not expected in parts of Wales and north-west England from Tuesday to Friday and in parts of the south of England on Friday.

Rivers

The river flood risk is VERY LOW for the next five days.

Localised, minor river flooding is possible but not expected in parts of Wales and the north-west of England from Tuesday to Friday and in parts of the south of England on Friday.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
