Steady

Minor inland flooding impacts are possible but not expected today (Saturday) for parts of England and Wales. The overall flood risk is VERY LOW.

Assessment of flood risk

Rivers

The river flood risk is VERY LOW for the next five days.

Localised minor impacts from river flooding are possible but not expected today (Saturday) across parts of England and Wales due to heavy rain falling on wet catchments along with some snowmelt, especially in upland areas.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Localised minor impacts from surface water flooding are possible but not expected today (Saturday) across parts of England and Wales due to heavy rain and snowmelt, especially in upland areas.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Saturday 08 January 2022

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Sunday 09 January 2022 (all times are local)**
