The overall flood risk for England and Wales for the next five days is **VERY LOW**. Localised minor coastal flooding impacts are possible along parts of the coast of East Anglia on Sunday and Monday.

Specific Area of Concern Map 1: Sunday 6 and Monday 7 February

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Localised coastal flooding impacts are possible along parts of the coast of East Anglia on Sunday and Monday (See Area of Concern Map).

Coastal flooding impacts are also possible but not expected elsewhere along the east coast at times from today (Saturday) until Monday, and for some exposed locations along the northwest coast of England today.

This is due to large surge, strong winds and wave action at times over the next three days.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Despite heavy rain in places on Saturday and Sunday morning, no more than minimal impacts are expected.

Rivers

The river flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Sunday 06 February 2022 (all times are local)**
