

Flood Guidance Statement

10:30hrs Friday 04 March 2022

Friday

4 Mar 2022 10:30-23:59

Trend since last FGS

Steady

Saturday

5 Mar 2022

Increased

Sunday

6 Mar 2022

Increased

Monday

7 Mar 2022

Steady

Tuesday

8 Mar 2022

Steady

The flood risk is VERY LOW for the next five days.

Assessment of flood risk

Rivers

The river flood risk is VERY LOW for the next five days.

Local minor river flooding impacts are possible but not expected in parts of the Midlands today (Friday) and tomorrow, and also in parts of the east of England over the weekend. This is due to rivers responding to recent rain, further persistent rain falling on wet catchments, and high tides slowing river discharge from some lower river reaches.

Surface water

The surface water flood risk is VERY LOW for the next five days, despite some rain falling on wet catchments today (Friday) and on Saturday.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Saturday 05 March 2022 (all times are local)**
