The overall flood risk for England and Wales for the next five days is VERY LOW.

## Assessment of flood risk

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Operational activities may be required for some southern North Sea coasts on Monday night and Tuesday morning, though any impacts are expected to be minimal.

### Rivers

The river flood risk is VERY LOW for the next five days, despite the potential for some heavy rain over parts of the north and west of England and Wales on Monday and Tuesday.

### Surface water

The surface water flood risk is VERY LOW for the next five days, despite the potential for some heavy rain over parts of the north and west of England and Wales on Monday and Tuesday.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

**MINIMAL**

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

**MINOR**

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

**SIGNIFICANT**

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

**SEVERE**

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
