Minor surface water impacts are possible during Wednesday evening overnight into Thursday across parts of England. The overall flood risk is VERY LOW.

## Specific Areas of Concern Map 1: Wednesday 18 and Thursday 19 May 2022

## Assessment of flood risk

### Surface water

---

The surface water flood risk is VERY LOW.

An area of heavy rain and showers is possible on Wednesday evening into Thursday. This could lead to some minor surface water flooding impacts which could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Refer to the Specific Areas of Concern Map.

### Rivers

---

The river flood risk is VERY LOW for the next five days.

### Coastal/Tidal

---

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

---

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
