Assessment of flood risk

Surface water

The surface water flood risk is LOW on Sunday.

Significant surface water flooding impacts are possible but not expected across parts of England today (Sunday). Please refer to Specific Areas of Concern Map for more details. Minor surface water flooding impacts are also possible but not expected more widely in the South and East of England, Midlands and Yorkshire and the Humber. This is due to heavy rain and thunderstorms today and tonight.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Rivers

The river flood risk is VERY LOW for the next five days.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Sunday 23 October 2022

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Monday 24 October 2022 (all times are local)**
