Steady

Minor coastal/tidal flood impacts are possible but not expected for parts of the north-west coast of England on Wednesday, Thursday and Friday. The overall flood risk across England and Wales is VERY LOW for the next five days.

## Assessment of flood risk

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Minor coastal/tidal flood impacts are possible but not expected for parts of the north-west coast of England on Wednesday, Thursday and Friday as unsettled weather coincides with spring tides.

### Surface water

The surface water flood risk is VERY LOW for the next five days.

### Rivers

The river flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Tuesday 25 October 2022

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
