Assessment of flood risk

Surface water

The surface water flood risk is LOW on Sunday.

Significant surface water flooding impacts are possible from Sunday afternoon from slow-moving heavy showers or severe thunderstorms.

Significant localised surface water flooding impacts are possible but not expected more widely on Sunday from slow-moving heavy showers or thunderstorms. See Specific Area of Concern Map.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

The river flood risk is VERY LOW for the next five days.

🖸 Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

The groundwater flood risk is VERY LOW for the next five days.

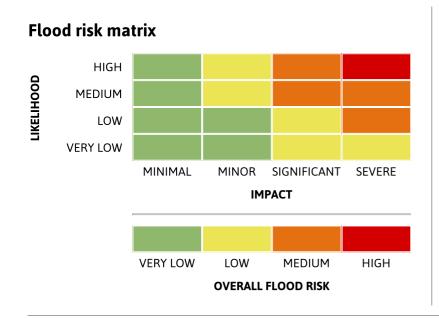

Flood Guidance Statement

10:30hrs Saturday 17 June 2023

A working partnership between

Agency

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads Isolated spray/wave on coastal promenades Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads Flooding affecting individual properties Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities Possible danger to life and damage to buildings/structures Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel Widespread flooding affecting whole communities Widespread disruption or loss of infrastructure Large scale evacuation of properties possible

Next statement due 10:30hrs Sunday 18 June 2023 (all times are local)
