Assessment of flood risk

Surface water

The surface water flood risk is LOW in the North of England today (Sunday).

Local significant surface water flooding is possible but not expected on Sunday afternoon and evening in parts of the North of England, due to the potential for heavy rain and showers associated with severe thunderstorms. See Areas of Concern Map.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Rivers

The river flood risk is VERY LOW for the next five days.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.
