## Assessment of flood risk

### Surface water

---

The surface water flood risk is LOW on Saturday.

Heavy thundery showers during the daytime and into the early evening on Saturday bring a risk of surface water flooding impacts. Isolated heavy showers on Sunday again bring a risk of flooding impacts. See Specific Areas of Concern Maps.

Minor surface water flooding impacts are also possible but not expected in parts of the East and South East of England, including London and Kent, on Sunday, and in parts of the South West of England and South Wales on Monday.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

### Rivers

---

The river flood risk is VERY LOW for the next five days.

### Coastal/Tidal

---

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

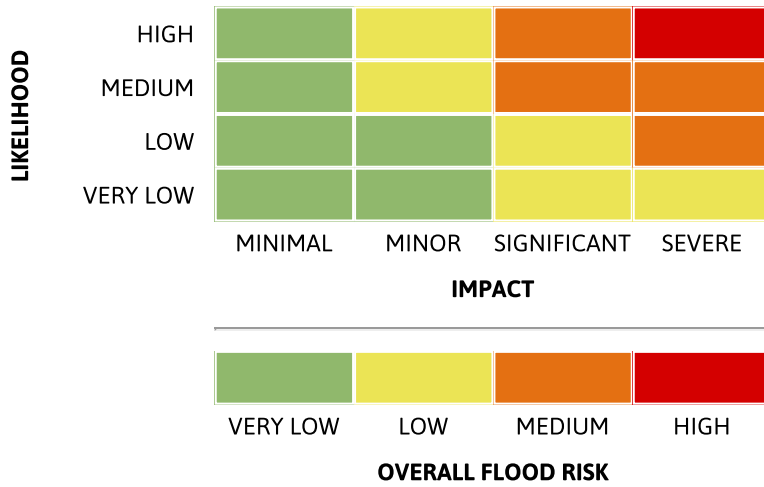

---

The groundwater flood risk is VERY LOW for the next five days.
