The overall flood risk for England and Wales for the next five days is VERY LOW.

## Assessment of flood risk

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Along parts of the east coast of England there is a risk of isolated spray on low-lying roads and coastal promenades around times of high tides over the weekend due to storm surge and large waves.

### Surface water

The surface water flood risk for the next five days is VERY LOW.

### Rivers

The river flood risk for the next five days is VERY LOW.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Saturday 14 October 2023

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
