## Assessment of flood risk

The river flood risk is MEDIUM.

Significant river flooding impacts are probable across parts of the north of England on Friday and Saturday.

Significant river flooding impacts are possible across other parts of England and Wales on Friday and Saturday. This is due to persistent and heavy rain affecting these areas. See Areas of Concern Map. Minor river flooding impacts are possible across parts England and Wales on Friday and Saturday, see Areas of Concern Map, and are possible but not expected more widely.

Significant ongoing river flooding impacts are also possible in parts of north east England into Sunday. River responses are expected to continue into Sunday and Monday, more widely across parts of England and Wales. Where rivers responses do continue minor impacts are possible, but not expected.

The surface water flood risk is MEDIUM.

Significant surface water flooding impacts are probable across parts of the north of England on Friday and Saturday.

Significant surface water flooding impacts are possible across other parts of England and Wales from Thursday to Saturday. See Areas of Concern Map.

Localised minor surface water flooding impacts are possible across parts England and Wales on Friday and Saturday, see Areas of Concern Map, and are possible but not expected more widely across England and Wales on Thursday and Friday, and in parts of the east of England on Saturday.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

## Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Minor coastal flooding impacts are possible but not expected along the coasts of Yorkshire and North East England on Friday and Saturday. Minimal coastal flooding impacts are possible more widely along the coast of East England on Friday and Saturday.

This is due to a combination of large waves and wind-blown spray.

The groundwater flood risk is VERY LOW for the next five days.

Agency

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads Isolated spray/wave on coastal promenades Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads Flooding affecting individual properties Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities Possible danger to life and damage to buildings/structures Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel Widespread flooding affecting whole communities Widespread disruption or loss of infrastructure Large scale evacuation of properties possible

Next statement due 10:30hrs Friday 20 October 2023 (all times are local)
