Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is MEDIUM today (Sunday).

Significant coastal flooding impacts are expected along the south coast of Cornwall today.

Minor coastal flooding impacts are probable for parts of the South and West coasts of England today. Minor flooding impacts are also possible more widely today and tomorrow. Further minor impacts are possible for parts of the the west and south coasts of England and Wales on Thursday. See Specific Areas of Concern maps.

Minor coastal impacts are possible but not expected along the North of England coasts today, continuing into Monday for the North East and Yorkshire coasts. Minimal impacts are also possible from the Humber to Kent, due to storm surge and large waves.

Surface water

The surface water flood risk is LOW.

Significant surface water flooding is possible but not expected today due to heavy rain and showers - see Areas of Concern Maps. Minor impacts are also probable across parts of South Wales.

Significant surface water flooding impacts are possible across the South of England and parts of Wales later Wednesday and Thursday - see Specific Areas of Concern Map.

Minor surface water flooding impacts are also possible but not expected across parts of England and Wales over the next five days.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Rivers

The river flood risk is LOW.

Significant river flooding is possible but not expected today due to heavy rain and showers - see Areas of Concern Maps.

Significant river flooding impacts are possible but not expected across the South of England and parts of Wales later Wednesday and Thursday - see Specific Areas of Concern Map.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Sunday 29 October 2023

6-10 day forecast
